### INORGANIC CHEMICAL ANALYSIS REPORT

Private well water information and recommendations

County:	Harnett	Name:	Chy	PP	Sam	ple Id Numb	er: 73.6)			
Location:				Rev	riewer _	1 CUR	1			
ANALYSIS REPORT  Your well water was tested for 15 metals, plus nitrates, nitrites, and pH. The results were evaluated using the federal drinking water standards. The pH is a measure of the acidity of the water. Drinking water may contain substances that can occur naturally in water or can be introduced into the water from man-made sources. (These recommendations are based on inorganic chemical analysis only.)										
TEST RESULTS AND USE RECOMMENDATIONS  Your well water meets federal drinking water standards. Your water can be used for drinking, cooking, washing, cleaning, bathing, and showering.										
The following substance(s) exceeded federal drinking water standards. Your water can be used for drinking, cooking, washing, cleaning, bathing, and showering, but <u>aesthetic</u> problems such as bad taste, odor, staining of porcelain, etc. may occur. You may want to install a household water treatment system to address aesthetic problems.										
-	Sarium Cadmium	THE RESERVE OF THE PARTY OF THE				agnesium				
Manganese   Selenium   Silver   Sodium   Zinc   pH    The following substance(s) exceeded federal drinking water standards: We recommend that your well water not be used for drinking or cooking, unless you install a water treatment system to remove the circled substance(s). However, it may be used for washing, cleaning, bathing, and showering.										
Arsenic Barium		Chromium	Copper	Fluoride	Lead	Iron	Magnesium			
Manganese Mercury Nitrate/Nitrite Selenium Silver Sodium Zinc pH  Re-sampling is recommended inmonths.  Re-sample for lead and /or copper. Take a first draw, 5 minute, and 15 minute sample inside the house (preferably the kitchen) and if possible a first draw, 5 minute and a 15 minute sample at the well head to determine the source of the lead and/or copper. Contact your local health department for re-sampling assistance.										
OTHER CONSIDERATIONS  Routine well water sampling for the above substances is recommended every two to three years. Sample										

Contact your local health department for more information or go to http://www.epi.state.nc/epi/oii/hsfactsheet.html

your well water when there is a known problem or contamination in your area, after repairs or replacement of

your well, or after a flooding event. Contact your local health department for sampling instructions.
