Lindsey,

I did speak with them about increasing the size of their shed and its not an issue at all. No additional site visit from us is required.

Hey Oliver!

I just talked to Mrs. Grishaw and she said she spoke with you about taking the building from a 12X20 to a 12X2. She said she spoke with you about it and you said that would not be a problem and that she did not need to go back through environmental. I told her that was fine I just need you to respond to this email saying that is ok with you so that I can put record of it in the file.

Thanks!!
