Coastal Plains Engineering

02/12/09

Harnett County Inspection Dept.
Mr. Jimmy Hall

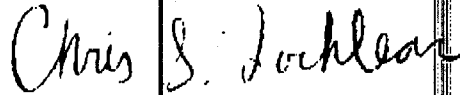

Re: Williams Mobile Homes Hangar

Dear Mr. Hall:

We have made the following changes to the above-mentioned job:

1) On Sheet PM1, the 4" waste piping from the 2' x 2' floor drain has been re-routed. It now runs directly from the drain at a 45 degree angle to the point where it exits the building.

Sincerely,

Christopher S. Locklear, PE

Attn: Mr. Jimmy Hall, Building Inspector

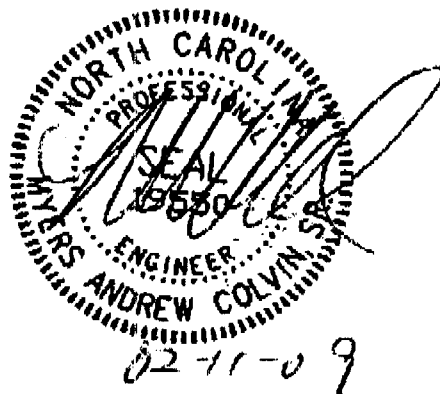

February 11th 2009

Re: Engineer's Letter

Subject: Footing Modification

All saturated soil which remains in the footing excavation shall be removed to a variable depth as necessary to backfill with No. 57 stone. The rear right corner of the foundation excavation along with approximately one third of the rear and right sides of the foundation were found to be the area of most concern for excessive moisture content. It is recommended that the excavation be allowed to continue to dry. The contractor shall then place the stone backfill on an as needed bases after removal of all remaining areas of excessive moisture.

Myers A. Colvin Sr. P.E.
