Application Number 15-50035263

Mr. Faircloth,

Thank you for submitting the plans for the new pre-engineered building. The plans have been carefully reviewed by a qualified code enforcement official to examine for compliance with the North Carolina Fire Prevention Code and all other fire protection regulatory documents. There are some items that were found during the plan review process that need to be addressed before a final inspection of the new facility can be given. These items are outlined and described below.

Plan Review Notes

- Fire Apparatus roads/access shall have an unobstructed width of 20 feet.
- Fire apparatus roads and access shall be designed and maintained to support the imposed loads of emergency apparatus.
- Fire extinguishers are required in the building. Location and number of extinguishers to be determined at final inspection.
- Per conversations with building owner only non-combustible metal bodies will be stored in the building.
- A fire final inspection is required. Call 910-893-0741 to schedule.
