RE: County of Harnett Land Use Application #03-5-6421

Dear Mr. Bashford,

On March 3, 2003, an Environmental Health Specialist from the Harnett County Health Department evaluated your property for the purpose of issuing an Improvement Permit. This individual was unable to issue a permit for this property due to concerns about one or more of the following:

- 1. Topography and/or landscape position. (.1940)
- 2. Soil characteristics – texture, structure, mineralogy. (.1941)
- 3. Soil wetness condition. (.1942)
- 4. Soil depth. (.1943)
- 5. Restrictive horizons. (.1944)
- 6. Available space. (.1945)
- 7. Other *Flood Plan*

This notification is not a denial. This is simply to inform you that the Environmental Health Specialist who evaluated your property was not able to issue a permit and that you need to consult with a private soil scientist. If you require a directory for the North Carolina Board of Licensing of Soil Scientists and have access to a computer you may log on to www.ncblss.org/director.html. If you do not have access to a computer you may request a copy of the directory from our office.

Sincerely,

James E. Manhart, R.S.
Environmental Health Specialist
Harnett County Health Department
