may not apply depending on site conditions and the delegated authority having jurisdiction.

#### SECTION F: GROUND STABILIZATION

3	SECTION E: GROUND STABILIZATION								
	Required Ground Stabilization Timeframes								
	Sit	te Area Description	Stabilize within this many calendar days after ceasing land disturbance	Timeframe variations					
	(a)	Perimeter dikes, swales, ditches, and perimeter slopes	7	None					
	(b)	High Quality Water (HQW) Zones	7	None					
	(c)	Slopes steeper than 3:1	7	If slopes are 10' or less in length and are not steeper than 2:1, 14 days are allowed					
	(d)	Slopes 3:1 to 4:1	14	-7 days for slopes greater than 50' in length and with slopes steeper than 4:1 -7 days for perimeter dikes, swales, ditches, perimeter slopes and HQW Zones -10 days for Falls Lake Watershed					
	(e)	Areas with slopes flatter than 4:1	14	-7 days for perimeter dikes, swales, ditches, perimeter slopes and HQW Zones -10 days for Falls Lake Watershed unless there is zero slope					

**Note:** After the permanent cessation of construction activities, any areas with temporary ground stabilization shall be converted to permanent ground stabilization as soon as practicable but in no case longer than 90 calendar days after the last land disturbing activity. Temporary ground stabilization shall be maintained in a manner to render the surface stable against accelerated erosion until permanent ground stabilization is achieved.

#### **GROUND STABILIZATION SPECIFICATION**

Stabilize the ground sufficiently so that rain will not dislodge the soil. Use one of the techniques in the table below:

Temporary Stabilization	Permanent Stabilization
<ul> <li>Temporary grass seed covered with straw or other mulches and tackifiers</li> </ul>	Permanent grass seed covered with straw or other mulches and tackifiers
<ul> <li>Hydroseeding</li> <li>Rolled erosion control products with or without temporary grass seed</li> <li>Appropriately applied straw or other mulch</li> <li>Plastic sheeting</li> </ul>	<ul> <li>Geotextile fabrics such as permanent soil reinforcement matting</li> <li>Hydroseeding</li> <li>Shrubs or other permanent plantings covered with mulch</li> <li>Uniform and evenly distributed ground cover sufficient to restrain erosion</li> <li>Structural methods such as concrete, asphalt or retaining walls</li> <li>Rolled erosion control products with grass seed</li> </ul>

#### POLYACRYLAMIDES (PAMS) AND FLOCCULANTS

- 1. Select flocculants that are appropriate for the soils being exposed during construction, selecting from the NC DWR List of Approved PAMS/Flocculants.
- 2. Apply flocculants at or before the inlets to Erosion and Sediment Control Measures.
- 3. Apply flocculants at the concentrations specified in the *NC DWR List of Approved PAMS/Flocculants* and in accordance with the manufacturer's instructions.
- 4. Provide ponding area for containment of treated Stormwater before discharging offsite.
- 5. Store flocculants in leak-proof containers that are kept under storm-resistant cover or surrounded by secondary containment structures.

#### **EQUIPMENT AND VEHICLE MAINTENANCE**

- 1. Maintain vehicles and equipment to prevent discharge of fluids.
- 2. Provide drip pans under any stored equipment.
- 3. Identify leaks and repair as soon as feasible, or remove leaking equipment from the project.
- 4. Collect all spent fluids, store in separate containers and properly dispose as hazardous waste (recycle when possible).
- 5. Remove leaking vehicles and construction equipment from service until the problem has been corrected.
- 6. Bring used fuels, lubricants, coolants, hydraulic fluids and other petroleum products to a recycling or disposal center that handles these materials.

#### LITTER, BUILDING MATERIAL AND LAND CLEARING WASTE

- 1. Never bury or burn waste. Place litter and debris in approved waste containers.
- 2. Provide a sufficient number and size of waste containers (e.g dumpster, trash receptacle) on site to contain construction and domestic wastes.
- 3. Locate waste containers at least 50 feet away from storm drain inlets and surface waters unless no other alternatives are reasonably available.
- 4. Locate waste containers on areas that do not receive substantial amounts of runoff from upland areas and does not drain directly to a storm drain, stream or wetland.
- 5. Cover waste containers at the end of each workday and before storm events or provide secondary containment. Repair or replace damaged waste containers.
- 6. Anchor all lightweight items in waste containers during times of high winds.7. Empty waste containers as needed to prevent overflow. Clean up immediately if
- 8. Dispose waste off-site at an approved disposal facility.
- On business days, clean up and dispose of waste in designated waste containers.

#### PAINT AND OTHER LIQUID WASTE

containers overflow.

- 1. Do not dump paint and other liquid waste into storm drains, streams or wetlands.
- 2. Locate paint washouts at least 50 feet away from storm drain inlets and surface waters unless no other alternatives are reasonably available.
- 3. Contain liquid wastes in a controlled area.
- 4. Containment must be labeled, sized and placed appropriately for the needs of site.

  5. Prevent the discharge of soans, solvents, detergents and other liquid wastes from
- 5. Prevent the discharge of soaps, solvents, detergents and other liquid wastes from construction sites.

#### PORTABLE TOILETS

- 1. Install portable toilets on level ground, at least 50 feet away from storm drains, streams or wetlands unless there is no alternative reasonably available. If 50 foot offset is not attainable, provide relocation of portable toilet behind silt fence or place on a gravel pad and surround with sand bags.
- 2. Provide staking or anchoring of portable toilets during periods of high winds or in high foot traffic areas.
- 3. Monitor portable toilets for leaking and properly dispose of any leaked material. Utilize a licensed sanitary waste hauler to remove leaking portable toilets and replace with properly operating unit.

#### **EARTHEN STOCKPILE MANAGEMENT**

- 1. Show stockpile locations on plans. Locate earthen-material stockpile areas at least 50 feet away from storm drain inlets, sediment basins, perimeter sediment controls and surface waters unless it can be shown no other alternatives are reasonably available.
- 2. Protect stockpile with silt fence installed along toe of slope with a minimum offset of five feet from the toe of stockpile.
- 3. Provide stable stone access point when feasible.
- 4. Stabilize stockpile within the timeframes provided on this sheet and in accordance with the approved plan and any additional requirements. Soil stabilization is defined as vegetative, physical or chemical coverage techniques that will restrain accelerated erosion on disturbed soils for temporary or permanent control needs.

#### **CONCRETE WASHOUTS**

- 1. Do not discharge concrete or cement slurry from the site.
- 2. Dispose of, or recycle settled, hardened concrete residue in accordance with local and state solid waste regulations and at an approved facility.
- 3. Manage washout from mortar mixers in accordance with the above item and in addition place the mixer and associated materials on impervious barrier and within lot perimeter silt fence.
- 4. Install temporary concrete washouts per local requirements, where applicable. If an alternate method or product is to be used, contact your approval authority for review and approval. If local standard details are not available, use one of the two types of temporary concrete washouts provided on this detail.
- 5. Do not use concrete washouts for dewatering or storing defective curb or sidewalk sections. Stormwater accumulated within the washout may not be pumped into or discharged to the storm drain system or receiving surface waters. Liquid waste must be pumped out and removed from project.
- 6. Locate washouts at least 50 feet from storm drain inlets and surface waters unless it can be shown that no other alternatives are reasonably available. At a minimum, install protection of storm drain inlet(s) closest to the washout which could receive spills or overflow.
- 7. Locate washouts in an easily accessible area, on level ground and install a stone entrance pad in front of the washout. Additional controls may be required by the approving authority.
- 8. Install at least one sign directing concrete trucks to the washout within the project limits. Post signage on the washout itself to identify this location.
- 9. Remove leavings from the washout when at approximately 75% capacity to limit overflow events. Replace the tarp, sand bags or other temporary structural components when no longer functional. When utilizing alternative or proprietary products, follow manufacturer's instructions.
- 10. At the completion of the concrete work, remove remaining leavings and dispose of in an approved disposal facility. Fill pit, if applicable, and stabilize any disturbance caused by removal of washout.

#### HERBICIDES, PESTICIDES AND RODENTICIDES

- Store and apply herbicides, pesticides and rodenticides in accordance with label restrictions
- 2. Store herbicides, pesticides and rodenticides in their original containers with the label, which lists directions for use, ingredients and first aid steps in case of accidental poisoning.
- Do not store herbicides, pesticides and rodenticides in areas where flooding is
  possible or where they may spill or leak into wells, stormwater drains, ground water
  or surface water. If a spill occurs, clean area immediately.
- 4. Do not stockpile these materials onsite.

#### HAZARDOUS AND TOXIC WASTE

- 1. Create designated hazardous waste collection areas on-site.
- 2. Place hazardous waste containers under cover or in secondary containment.

NORTH CAROLINA

3. Do not store hazardous chemicals, drums or bagged materials directly on the ground.

NCG01 GROUND STABILIZATION

AND MATERIALS HANDLING

00G-03

#### PART III SELF-INSPECTION, RECORDKEEPING AND REPORTING

#### **SECTION A: SELF-INSPECTION**

Self-inspections are required during normal business hours in accordance with the table below. When adverse weather or site conditions would cause the safety of the inspection personnel to be in jeopardy, the inspection may be delayed until the next business day on which it is safe to perform the inspection. In addition, when a storm event of equal to or greater than 1.0 inch occurs outside of normal business hours, the self-inspection shall be performed upon the commencement of the next business day. Any time when inspections were delayed shall be noted in the Inspection Record.

Inspect	Frequency (during normal business hours)	Inspection records must include:
(1) Rain gauge maintained in good working order	Daily	Daily rainfall amounts.  If no daily rain gauge observations are made during weekend of holiday periods, and no individual-day rainfall information is available, record the cumulative rain measurement for those un attended days (and this will determine if a site inspection is needed). Days on which no rainfall occurred shall be recorded a "zero." The permittee may use another rain-monitoring device approved by the Division.
(2) E&SC Measures	At least once per 7 calendar days and within 24 hours of a rain event ≥ 1.0 inch in 24 hours	<ol> <li>Identification of the measures inspected,</li> <li>Date and time of the inspection,</li> <li>Name of the person performing the inspection,</li> <li>Indication of whether the measures were operating properly,</li> <li>Description of maintenance needs for the measure,</li> <li>Description, evidence, and date of corrective actions taken.</li> </ol>
(3) Stormwater discharge outfalls (SDOs)	At least once per 7 calendar days and within 24 hours of a rain event $\geq 1.0$ inch in 24 hours	<ol> <li>Identification of the discharge outfalls inspected,</li> <li>Date and time of the inspection,</li> <li>Name of the person performing the inspection,</li> <li>Evidence of indicators of stormwater pollution such as oil sheen, floating or suspended solids or discoloration,</li> <li>Indication of visible sediment leaving the site,</li> <li>Description, evidence, and date of corrective actions taken.</li> </ol>
(4) Perimeter of site	At least once per 7 calendar days and within 24 hours of a rain event ≥ 1.0 inch in 24 hours	<ol> <li>If visible sedimentation is found outside site limits, then a record of the following shall be made:</li> <li>Actions taken to clean up or stabilize the sediment that has lef the site limits,</li> <li>Description, evidence, and date of corrective actions taken, an</li> <li>An explanation as to the actions taken to control future releases.</li> </ol>
(5) Streams or wetlands onsite or offsite (where accessible)	At least once per 7 calendar days and within 24 hours of a rain event $\geq 1.0$ inch in 24 hours	If the stream or wetland has increased visible sedimentation or a stream has visible increased turbidity from the construction activity, then a record of the following shall be made:  1. Description, evidence and date of corrective actions taken, and 2. Records of the required reports to the appropriate Division Regional Office per Part III, Section C, Item (2)(a) of this permit
(6) Ground stabilization measures	After each phase of grading	<ol> <li>The phase of grading (installation of perimeter E&amp;SC measures, clearing and grubbing, installation of storm drainage facilities, completion of all land-disturbing activity, construction or redevelopment, permanent ground cover).</li> <li>Documentation that the required ground stabilization measures have been provided within the required timeframe or an assurance that they will be provided as soon as possible.</li> </ol>

NOTE: The rain inspection resets the required 7 calendar day inspection requirement.

### **PART III**

#### SELF-INSPECTION, RECORDKEEPING AND REPORTING

#### **SECTION B: RECORDKEEPING**

#### 1. E&SC Plan Documentation

The approved E&SC plan as well as any approved deviation shall be kept on the site. The approved E&SC plan must be kept up-to-date throughout the coverage under this permit. The following items pertaining to the E&SC plan shall be kept on site and available for inspection at all times during normal business hours.

Item to Document	Documentation Requirements
(a) Each E&SC measure has been installed and does not significantly deviate from the locations, dimensions and relative elevations shown on the approved E&SC plan.	Initial and date each E&SC measure on a copy of the approved E&SC plan or complete, date and sign an inspection report that lists each E&SC measure shown on the approved E&SC plan. This documentation is required upon the initial installation of the E&SC measures or if the E&SC measures are modified after initial installation.
(b) A phase of grading has been completed.	Initial and date a copy of the approved E&SC plan or complete, date and sign an inspection report to indicate completion of the construction phase.
(c) Ground cover is located and installed in accordance with the approved E&SC plan.	Initial and date a copy of the approved E&SC plan or complete, date and sign an inspection report to indicate compliance with approved ground cover specifications.
(d) The maintenance and repair requirements for all E&SC measures have been performed.	Complete, date and sign an inspection report.
(e) Corrective actions have been taken to E&SC measures.	Initial and date a copy of the approved E&SC plan or complete, date and sign an inspection report to indicate the completion of the corrective action.

#### 2. Additional Documentation to be Kept on Site

In addition to the E&SC plan documents above, the following items shall be kept on the site and available for inspectors at all times during normal business hours, unless the Division provides a site-specific exemption based on unique site conditions that make this requirement not practical:

- (a) This General Permit as well as the Certificate of Coverage, after it is received.
- (b) Records of inspections made during the previous twelve months. The permittee shall record the required observations on the Inspection Record Form provided by the Division or a similar inspection form that includes all the required elements. Use of electronically-available records in lieu of the required paper copies will be allowed if shown to provide equal access and utility as the hard-copy records.

#### 3. Documentation to be Retained for Three Years

All data used to complete the e-NOI and all inspection records shall be maintained for a period of three years after project completion and made available upon request. [40 CFR 122.41]

## PART II, SECTION G, ITEM (4)

#### DRAW DOWN OF SEDIMENT BASINS FOR MAINTENANCE OR CLOSE OUT

Sediment basins and traps that receive runoff from drainage areas of one acre or more shall use outlet structures that withdraw water from the surface when these devices need to be drawn down for maintenance or close out unless this is infeasible. The circumstances in which it is not feasible to withdraw water from the surface shall be rare (for example, times with extended cold weather). Non-surface withdrawals from sediment basins shall be allowed only when all of the following criteria have been met:

- (a) The E&SC plan authority has been provided with documentation of the non-surface withdrawal and the specific time periods or conditions in which it will occur. The non-surface withdrawal shall not commence until the E&SC plan authority has approved these items,
- (b) The non-surface withdrawal has been reported as an anticipated bypass in accordance with Part III, Section C, Item (2)(c) and (d) of this permit,
- (c) Dewatering discharges are treated with controls to minimize discharges of pollutants from stormwater that is removed from the sediment basin. Examples of appropriate controls include properly sited, designed and maintained dewatering tanks, weir tanks, and filtration systems,
- (d) Vegetated, upland areas of the sites or a properly designed stone pad is used to the extent feasible at the outlet of the dewatering treatment devices described in Item (c) above,
- (e) Velocity dissipation devices such as check dams, sediment traps, and riprap are provided at the discharge points of all dewatering devices, and
- (f) Sediment removed from the dewatering treatment devices described in Item (c) above is disposed of in a manner that does not cause deposition of sediment into waters of the United States.

#### **PART III** SELF-INSPECTION, RECORDKEEPING AND REPORTING

#### **SECTION C: REPORTING**

#### 1. Occurrences that Must be Reported

Permittees shall report the following occurrences:

(a) Visible sediment deposition in a stream or wetland.

#### (b) Oil spills if:

- They are 25 gallons or more,
- They are less than 25 gallons but cannot be cleaned up within 24 hours,
- They cause sheen on surface waters (regardless of volume), or
- They are within 100 feet of surface waters (regardless of volume).
- (c) Releases of hazardous substances in excess of reportable quantities under Section 311 of the Clean Water Act (Ref: 40 CFR 110.3 and 40 CFR 117.3) or Section 102 of CERCLA (Ref: 40 CFR 302.4) or G.S. 143-215.85.
- (d) Anticipated bypasses and unanticipated bypasses.
- (e) Noncompliance with the conditions of this permit that may endanger health or the environment.

#### 2. Reporting Timeframes and Other Requirements

After a permittee becomes aware of an occurrence that must be reported, he shall contact the appropriate Division regional office within the timeframes and in accordance with the other requirements listed below. Occurrences outside normal business hours may also be reported to the Department's Environmental Emergency Center personnel at (800) 858-0368.

Occurrence	Reporting Timeframes (After Discovery) and Other Requirements			
(a) Visible sediment	Within 24 hours, an oral or electronic notification.			
deposition in a	Within 7 calendar days, a report that contains a description of the			
stream or wetland	sediment and actions taken to address the cause of the deposition.			
	Division staff may waive the requirement for a written report on a			
	case-by-case basis.			
	• If the stream is named on the NC 303(d) list as impaired for sediment-			
	related causes, the permittee may be required to perform additional			
	monitoring, inspections or apply more stringent practices if staff			
	determine that additional requirements are needed to assure compliance			
	with the federal or state impaired-waters conditions.			
(b) Oil spills and	Within 24 hours, an oral or electronic notification. The notification			
release of	shall include information about the date, time, nature, volume and			
hazardous	location of the spill or release.			
substances per Item				
1(b)-(c) above				
(c) Anticipated	A report at least ten days before the date of the bypass, if possible.			
bypasses [40 CFR	The report shall include an evaluation of the anticipated quality and			
122.41(m)(3)]	effect of the bypass.			
(d) Unanticipated	Within 24 hours, an oral or electronic notification.			
bypasses [40 CFR	Within 7 calendar days, a report that includes an evaluation of the			
122.41(m)(3)]	quality and effect of the bypass.			
(e) Noncompliance	Within 24 hours, an oral or electronic notification.			
with the conditions	Within 7 calendar days, a report that contains a description of the			
of this permit that	noncompliance, and its causes; the period of noncompliance,			
may endanger	including exact dates and times, and if the noncompliance has not			
health or the	been corrected, the anticipated time noncompliance is expected to			
environment[40	continue; and steps taken or planned to reduce, eliminate, and			
CFR 122.41(I)(7)]	prevent reoccurrence of the noncompliance. [40 CFR 122.41(I)(6).			
	Division staff may waive the requirement for a written report on a			
	case-by-case basis.

- 6" TOPSOIL, SEED AND NORTH AMERICAN VMAX SC250 TRM

1. INSTALL AND ANCHOR TURF REINFORCED MAT PER MANUFACTURER'S RECOMMENDATIONS.

2. SEE GRADING PLAN FOR VARIATIONS IN CHANNEL DEPTH.

TRM LINED DRAINAGE CHANNEL

MAINTENANCE:

PERMANENTLY STABILIZED.

INSPECT AND REPAIR WEEKLY OR AFTER EACH 1/2 INCH STORM EVENT AND REMOVE SEDIMENT. REMOVE ALL

ACCUMULATED SEDIMENT ON OUTLET PROTECTION. REPLACE STONE AS NEEDED TO MAINTAIN SPECIFIED

DIMENSIONS. SEDIMENT SHALL BE DEPOSITED TO AN AREA THAT WILL NOT CONTRIBUTE SEDIMENT OFF-SITE AND CAN BE

#### SEEDING SCHEDULE:

PERFORM SPRING SEEDING BETWEEN FEBRUARY 1 AND APRIL 15. PERFORM FALL SEEDING BETWEEN AUGUST 20 AND OCTOBER 25. SEEDING MIX:

1. TALL FESCUE: 100 LBS/AC

- 2. COMMON BERMUDA GRASS: 25 LBS/AC (USE UNHULLED
- SEEDING IN FALL) 3. KOBE LESPEDEZA: 10 LBS/AC (INCREASE TO 40 LBS/AC ON SLOPES)

#### NURSE PLANTS:

- 1. BETWEEN MAY 1 AND AUGUST 15, ADD 10 LBS/AC GERMAN MILLET OR 15 LBS/AC SUDANGRASS
- 2. PRIOR TO MAY 1 AND AFTER AUGUST 15, ADD 40 LBS/AC RYE

ALTERNATE SEEDING MIX MAY BE PROPOSED BY CONTRACTOR FOR APPROVAL BY ENGINEER

#### **TEMPORARY SEEDING:**

- JANUARY 1 THROUGH MAY 1:
- 1. RYE (GRAIN): 120 LBS/AC
- 2. KOBE LESPEDEZA: 50 LBS/AC MAY 1 THROUGH AUGUST 15:
- 1. GERMAN MILLET: 40 LBS/AC AUGUST 15 THROUGH DECEMBER 15 (WITH APPROVAL OF
- ENGINEER): 1. RYE (GRAIN): 120 LBS/AC

IMMEDIATELY PROTECT SEEDED AREAS AGAINST EROSION BY MULCHING OR PLACING EROSION CONTROL MATTING. USE EROSION CONTROL MATTING OR BONDED FIBER MATRIX WHERE REQUIRED ON DRAWINGS OR IN SPECIFICATIONS. STRAW MULCH:

- 1. CLEAN, SEED FREE, THRESHED STRAW OF OATS, WHEAT, BARLEY, RYE, OR OTHER LOCALLY AVAILABLE MULCH MATERIAL.
- 2. SPREAD MULCH IN A CONTINUOUS BLANKET USING 2 TONS/ACRE TO A DEPTH OF 4 TO 5 STRAWS.

- 3. IMMEDIATELY FOLLOWING SPREADING OF MULCH, SECURE
- 4. APPLY ASPHALT BINDER AT A RATE OF 0.10 GALS PER SQUARE YARD (10 GALS/1,000 SQ FT) OR ANCHOR WITH LIGHTWEIGHT NETS STAPLED OVER MULCH.

#### WOOD FIBER AND CELLULOSE FIBER MULCH (HYDROSEEDING):

- 2. pH: 5
- 5. CELLULOSE FIBER: 30% MAXIMUM
- 7. APPLY WITH SEED AS PART OF A HYDROSEEDER SLURRY.

- 6. FIBER MATRIX: 100% WOOD EXCELSIOR (0.5 LBS/SY) 80% OF
- 7. INSTALL PER DETAIL 7 ON SHEET 00C-02 OR MANUFACTURER'S

#### BONDED FIBER MATRIX (OPTION FOR SLOPES):

OF MULCH

#### TURF REINFORCEMENT MAT:

- AND CHEMICAL DEGRADATION.
- ALLOWABLE FLOW VELOCITY: 7 FPS MINIMUM

- WITH NETTING OR ASPHALT BINDER.
- USE WITH DARK GREEN MARKER DYE.
- 3. MOISTURE CONTENT: 12%
- 4. WOOD FIBER: 70% MAXIMUM
- 6. WATER HOLDING CAPACITY: 1100% MINIMUM

#### **EROSION CONTROL MAT:**

- ROLLED WOOD EXCELSIOR MATTING ALLOWABLE SHEAR STRESS: 1.75 PSF MINIMUM
- 3. LONGEVITY: 8 MONTHS 4. TOP NET: PHOTODEGRADABLE POLYPROPYLENE
- BOTTOM NET: NONE
- FIBERS 6-INCHES OR MORE.

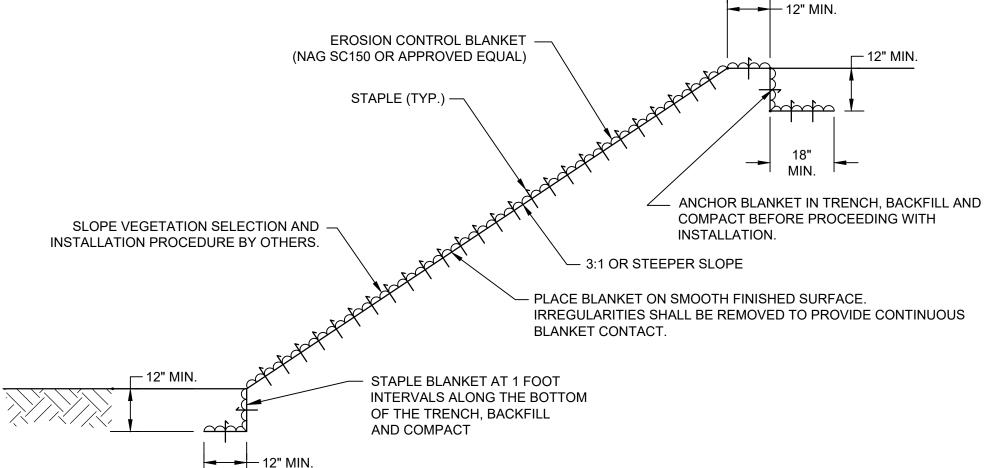

# RECOMMENDATIONS.

- APPLY IN 2-STEP PROCESS AS FOLLOWS:
- FIRST PASS INCLUDE ALL SEED, ALL AMMENDMENTS, AND 1/3
- SECOND PASS INCLUDE 2/3 OF MULCH AND APPLY IN OPPOSING DIRECTION OF FIRST PASS IF APPLIED BY TOWER 2. SEE SECTION 02485 FOR ADDITIONAL INFORMATION
- ROLLED POLYPROPYLENE PRODUCT STABILIZED AGAINST UV
- 2. ALLOWABLE SHEAR STRESS: 7 PSF MINIMUM
- 4. LONGEVITY: PERMANENT

ISSUED FOR CONSTRUCTION

ISSUED FOR BIDDING

**DESCRIPTION** 

## MAINTENANCE NOTES:

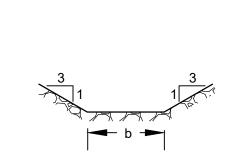

- 1. INSPECT ROLLED EROSION CONTROL PRODUCTS AT LEAST WEEKLY AND AFTER EACH SIGNIFICANT (1 INCH OR GREATER) RAIN FALL EVENT REPAIR IMMEDIATELY.
- 2. GOOD CONTACT WITH THE GROUND MUST BE MAINTAINED, AND EROSION MUST NOT OCCUR BENEATH THE BLANKET.
- 3. ANY AREAS OF THE BLANKET THAT ARE DAMAGED OR NOT IN CLOSE CONTACT WITH THE GROUND SHALL BE REPAIRED AND STAPLED.
- 4. IF EROSION OCCURS DUE TO POORLY CONTROLLED DRAINAGE, THE PROBLEM SHALL BE FIXED AND THE ERODED AREA PROTECTED.
- 5. MONITOR AND REPAIR THE BLANKET AS NECESSARY UNTIL GROUND COVER IS ESTABLISHED.

## **INSTALLATION NOTES:**

- 1. SEED SLOPE FACE PRIOR TO PLACEMENT OF EROSION BLANKET.
- 2. WHEN OVERLAPPING BLANKETS, A MINIMUM OVERLAP OF 3 INCHES ON THE ADJACENT ROLL ALONG THE SLOPE, AND A MINIMUM OF 1 FOOT PERPENDICULAR TO THE SLOPE (ALONG THE CONTOURS).
- 3. BLANKET SHOULD BE STABLED USING A 3 FOOT CENTER-TO-CENTER PATTERN.

**EROSION CONTROL BLANKET** 

4. STAPLES SHOULD BE 11 GAUGE, AT LEAST 6 INCHES LENGTH BY 1 INCH WIDTH STAPLES OR 12 INCH MINIMUM LENGTH WOODEN STAKES, OR APPROVED EQUAL. STAPLES SHALL BE DRIVEN SUCH THAT THE TOP OF THE STAPLE IS FLUSH WITH THE GROUND SURFACE.

SCALE As indicated

SHEET **00S-01** 

#### STRUCTURAL GENERAL NOTES:

#### G1. SCOPE

THE NOTES ON THIS SHEET AND ALL THE STANDARD STRUCTURAL DETAILS ARE GENERAL AND APPLY TO THE ENTIRE PROJECT WHETHER SPECIFICALLY CALLED OUT OR NOT, UNLESS OTHERWISE SPECIFIED.

#### G2. APPLICABLE SPECIFICATIONS AND CODES

- . NORTH CAROLINA BUILDING CODE, 2018 EDITION, INCLUDING LOCAL JURISDICTION AMENDMENTS
- 2. IBC 2015 INTERNATIONAL BUILDING CODE WITH NORTH CAROLINA AMENDMENTS
- 3. ASCE 7-10 MINIMUM DESIGN LOADS
- 4. ACI 318-14 STRUCTURAL CONCRETE ACI 530-13 STRUCTURAL MASONRY
- 6. AISC STEEL CONSTRUCTION MANUAL 14th EDITION, AISC 360-10

#### G3. DESIGN CRITERIA

- 1. MINIMUM VERTICAL LIVE LOADS: SEE INDIVIDUAL PLANS. A. UNIFORM LIVE LOAD INCLUDES ALLOWANCE FOR:
  - \* UNIFORM SNOW LOAD.
  - \* UNIFORM PIPING LOAD (ONLY FOR PIPES SMALLER THAN 12" DIA).

- WIND LOADS: A. BASIC WIND SPEED: 116 MPH
- B. WIND EXPOSURE: C
- C. OPEN STRUCTURES D. RISK CATEGORY: II

#### SEISMIC:

- A. RISK CATEGORY: II
- B. SEISMIC IMPORTANCE FACTOR (IE): 1.0 C. SPECTRAL RESPONSE ACCELERATIONS: SS=0.176, S1=0.084
- D. SITE CLASS: D
- E. SPECTRAL RESPONSE COEFF: SDS=0.188, SD1=0.134
- F. SEISMIC DESIGN CATEGORY: C
- BASIC SEISMIC-FORCE-RESISTING SYSTEM ORDINARY REINFORCED CONCRETE SHEAR WALLS
  - RESPONSE MODIFICATION FACTOR: R=4 SYSTEM OVERSTRENGTH FACTOR:  $\Omega = 2.5$ DEFLECTION AMPLIFICATION FACTOR: Cd=4

#### 4. SNOW LOAD:

- A. FLAT ROOF SNOW (PF): 15 PSF
- B. SNOW EXPOSURE FACTOR (CE): 1.0 C. SNOW IMPORTANCE FACTOR (IS): 1.0
- D. THERMAL FACTOR (CT): 1.0
- . GROUND SNOW (PG) = 15 PSF
- 5. FUTURE UNLESS SPECIFICALLY NOTED, THERE ARE NO PROVISIONS MADE FOR FUTURE FLOOR, ROOF, OR OTHER LOADS.

#### G4. <u>SITEWORK/EXCAVATION</u>

- 1. IF OPEN CUT EXCAVATIONS ARE PERFORMED, THEY SHALL BE SLOPED NO STEEPER THAN 1V:2H. IF DOING THIS BRINGS THE TOP OF THE EXCAVATION SLOPE WITHIN 5-FEET OF AN ADJACENT STRUCTURE OR UTILITY SUPPORTED ON SHALLOW FOUNDATIONS, THEN AN EXCAVATION SUPPORT SYSTEM WILL BE REQUIRED TO SAFEGUARD THE ADJACENT STRUCTURE.
- REPORT BY HDR ENGINEERING INC. FOR NORTHWEST CONVENIENCE CENTER PROJECT No. 10354679, DATED JANUARY 19, 2022.

2. FOR EXCAVATION REQUIREMENTS SEE SPECIFICATIONS 31 23 00 AND GEOTECHNICAL

- 3. FOUNDATIONS HAVE BEEN DESIGNED FOR A MAXIMUM ALLOWABLE BEARING PRESSURE OF 2,500 PSF BY HDR ENGINEERING INC. DATED JANUARY 19, 2022.
- 4. THE CONTRACTOR SHALL PROPERLY DEWATER THE SITE AS NEEDED SO THAT ALL CONCRETE CAN BE PLACED IN DRY SOIL CONDITIONS. THE DEWATERING PROGRAM SHALL BE AS DICTATED BY THE GEOTECHNICAL REPORT AS MENTIONED HEREIN.
- 5. DEWATERING WELL POINTS, SUMPS, WELLS, ETC. SHALL ONLY BE PLACED INSIDE THE

G5. SAFETY
SAFETY AND STRUCTURE STABILITY DURING CONSTRUCTION ARE THE SOLE RESPONSIBILITY OF THE CONTRACTOR. STRUCTURES HAVE BEEN DESIGNED TO RESIST THE DESIGN LIVE LOADS ONLY AS A COMPLETED STRUCTURE.

#### G6. STANDARD DETAILS

THE STANDARD DETAILS DEPICT TYPICAL DETAILING TO BE USED ON THIS PROJECT. IF CONDITIONS ARE NOT EXPLICITLY SHOWN ON THE DRAWINGS THEY SHALL BE MADE SIMILAR TO THE STANDARD DETAILS. OBTAIN ENGINEER APPROVAL IN WRITING FOR SIMILAR CONDITIONS PRIOR TO CONSTRUCTION.

IF THERE ARE CONFLICTS BETWEEN CONTRACT DRAWINGS AND SPECIFICATIONS, THE MORE STRINGENT INTERPRETATION SHALL CONTROL.

#### CONCRETE

- C1. DESIGN PROPERTIES: f'c = 4,000 PSI (UNO) Fy = 60,000 PSI
- C2. CONCRETE COVER

UNLESS OTHERWISE NOTED, PROVIDE CONCRETE COVER FOR REINFORCING AS FOLLOWS: CONCRETE DEPOSITED AGAINST EARTH: 3" UNDER WATERSTOPS (WALL TO SLAB):

ALL OTHER: SEE DRAWINGS FOR EXCEPTIONS.

- C3. SEE SPECIFICATIONS FOR REINFORCING PLACEMENT REQUIREMENTS.
- C4. PROVIDE 3/4" CHAMFERS AT ALL EXPOSED EDGES AND 1/2" CHAMFERS AT JOINTS AS SHOWN. NOT ALL CHAMFERS MAY BE SHOWN ON DRAWINGS.
- C5. FIELD ADJUST REINFORCING AT OPENINGS AND EMBEDDED ITEMS AS SPECIFIED OR AS REQUIRED BY STANDARD DETAILS.
- C6. ANCHOR BOLTS NOT SPECIFIED BY ENGINEER SHALL BE DESIGNED BY CONTRACTOR IN ACCORDANCE WITH APPLICABLE PROJECT CODE REQUIREMENTS. COORDINATE LOCATION, SIZE AND EMBEDMENT PRIOR TO CASTING CONCRETE.
- C7. ABSOLUTELY NO WELDING OF REINFORCING BARS OR TORCHING TO BEND REINFORCING BARS SHALL BE ALLOWED WITHOUT WRITTEN SPECIFIC APPROVAL FROM THE STRUCTURAL ENGINEER.

#### SPECIAL INSPECTIONS

SP01. SPECIAL INSPECTIONS SHALL BE PERFORMED IN ACCORDANCE WITH CHAPTER 17 OF THE 2018 NORTH CAROLINA BUILDING CODE (IBC) BY A SPECIAL INSPECTOR HIRED BY THE OWNER TO PERFORM THE SPECIAL INSPECTIONS LISTED BELOW. THE SPECIAL INSPECTOR SHALL BE QUALIFIED BY AN APPROVED AGENCY ACCORDING TO THE COUNTY'S BUILDING OFFICIAL TO PERFORM THE SPECIAL INSPECTIONS FOR WHICH THEY WILL BE UNDERTAKING. THE CONTRACTOR SHALL COORDINATE WITH AND NOTIFY THE SPECIAL INSPECTOR OF ALL TESTS. THE SPECIAL INSPECTOR SHALL BE RESPONSIBLE TO VERIFY THAT THE ITEMS DETAIL IN THE CONSTRUCTION DOCUMENTS WERE BUILT ACCORDINGLY AND SHALL PREPARE, SIGN, AND FURNISH INSPECTION REPORTS TO THE BUILDING OFFICIAL AND THE ARCHITECT FOR ALL TIME SPENT AT THE SITE. THE INSPECTOR SHALL BRING DISCREPANCIES TO THE IMMEDIATE ATTENTION OF THE GENERAL CONTRACTOR FOR CORRECTION. IF THE DISCREPANCIES ARE NOT CORRECTED, THE DISCREPANCIES SHALL BE BROUGHT TO THE ATTENTION OF THE BUILDING OFFICIAL AND TO THE ENGINEER PRIOR TO THE COMPLETION OF THAT PHASE OF THE WORK. THESE SPECIAL INSPECTIONS ARE IN ADDITION TO THE OTHER INSPECTIONS LISTED IN THESE STRUCTURAL NOTES OR PROJECT SPECIFICATIONS.

THE FOLLOWING IS A LIST OF INSPECTIONS SHALL BE PERFORMED IN ACCORDANCE WITH CHAPTER 17 OF

- THE 2018 NORTH CAROLINA BUILDING CODE. EXCAVATION AND PROOF ROLLING
- STRUCTURAL FILL PLACEMENT AND COMPACTION
- BACK FILLING
- REINFORCING STEEL FOR CONCRETE STRUCTURES ANCHOR ROD, BOLT PLACEMENT
- CONCRETE CONSTRUCTION
- WELDING
- EXPANSION ANCHORS AND ADHESIVE BOLTS/ DOWELS/ RODS/ INSTALLATION

#### DEFERRED SUBMITTALS

- DS01. DEFERRED SUBMITTALS ARE THOSE PORTIONS OF THE DESIGN WHICH ARE NOT SUBMITTED AT THE TIME OF PERMIT APPLICATION AND WHICH ARE TO BE SUBMITTED TO THE PERMITTING AGENCY FOR ACCEPTANCE PRIOR TO INSTALLATION OF THAT PORTION OF THE WORK.
- DS02. THE FOLLOWING IS A LIST OF DEFERRED SUBMITTALS PER IBC SECTION 107.3.4.1 THAT ARE EXPECTED TO CONTAIN STRUCTURAL CALCULATIONS OF SAFETY RELATED SYSTEM INFORMATION FOR REVIEW TO MEET BUILDING PERMITTING REQUIREMENTS FOR DESIGNED SYSTEMS. PRIOR TO INSTALLATION OF THE INDICATED STRUCTURAL ELEMENT, EQUIPMENT, DISTRIBUTION SYSTEM, OR COMPONENT OR ITS ANCHORAGE THE CONTRACTOR SHALL SUBMIT THE REQUIRED ENGINEER CERTIFICATION SUPPORTING DATA AND DRAWINGS FOR REVIEW AND ACCEPTANCE BY THE ENGINEER, ADDITIONALLY, ACCEPTANCE INDICATED ON THE ENGINEER'S COMMENT FORM, ALONG WITH THE COMPLETED FINAL SUBMITTAL SHALL THEN BE FILED BY THE CONTRACTOR AND ACKNOWLEDGED AS ACCEPTED BY THE PERMITTING AGENCY PRIOR TO INSTALLATION OF THESE ITEMS.

DEFERRED SUBMITTALS LIST: SPECIFICATION SECTIONS ITEM

MISC. METAL FABRICATIONS

ANY OTHER EQUIPMENT OF COMPONENT IN WHICH A TECHNICAL SPECIFICATION REQUIRES SUBMITTAL OF EQUIPMENT OF ANCHORAGE SYSTEM CALCULATIONS

#### Statement of Special Inspections

Project: HARNETT COUNTY NORTHWEST

Location: OAKRIDGE RIVER ROAD AND REVELS ROAD INTERSECTION, NC Owner: HARNETT COUNTY

Design Professional in Responsible Charge: Michael Tepedino, PE #027764

This Statement of Special Inspections is submitted as a condition for permit issuance in accordance with the Special Inspection and Structural Testing requirements of the Building Code. It includes a schedule of Special Inspection services applicable to this project as well as the name of the Special Inspection Coordinator and the identity of other approved agencies to be retained for conducting these inspections and tests. This Statement of Special Inspections encompass the following disciplines:

Mechanical/Electrical/Plumbing Architectural Other:

The Special Inspection Coordinator shall keep records of all inspections and shall furnish inspection reports to the Building Official and the Registered Design Professional in Responsible Charge. Discovered discrepancies shall be brought to the immediate attention of the Contractor for correction. If such discrepancies are not corrected, the discrepancies shall be brought to the attention of the Building Official and the Registered Design Professional in Responsible Charge. The Special Inspection program does not relieve the Contractor of his or her responsibilities.

Interim reports shall be submitted to the Building Official and the Registered Design Professional in Responsible Charge.

A Final Report of Special Inspections documenting completion of all required Special Inspections, testing and correction of any discrepancies noted in the inspections shall be submitted prior to issuance of a Certificate of Use and Occupancy.

Job site safety and means and methods of construction are solely the responsibility of the Contractor.

Interim Report Frequency: 14 Days or 
per attached schedule. Prepared by:

Building Official's Acceptance: Owner's Authorization:

CASE Form 101 • Statement of Special Inspections • ©CASE 2004

## Schedule of Inspection and Testing Agencies

This Statement of Special Inspections / Quality Assurance Plan includes the following building systems:

Soils and Foundations Spray Fire Resistant Material Cast-in-Place Concrete Wood Construction Exterior Insulation and Finish System Precast Concrete Masonry Structural Steel Mechanical & Electrical Systems Architectural Systems Cold-Formed Steel Framing Special Cases

	Contact:  TBD Contact:  TBD Contact:  HDR Engineering Inc. of the Carolinas

Note: The inspectors and testing agencies shall be engaged by the Owner or the Owner's Agent, and not by the Contractor or Subcontractor whose work is to be inspected or tested. Any conflict of interest must be disclosed to the Building Official, prior to commencing work.

CASE Form 101 • Statement of Special Inspections • ©CASE 2004

## Soils and Foundations

Page

Item	Agency # (Qualif.)	Scope
Shallow Foundations	Agency 2 or 3	Inspect soils below footings for adequate bearing capacity and consistency with geotechnical report.
	PE/GE	Inspect removal of unsuitable material and preparation of subgrade prior to placement of controlled fill
2. Controlled Structural Fill	Agency 2 or 3	Perform sieve tests (ASTM D422 & D1140) and modified Proctor tests (ASTM D1557) of each source of fill material.
	PE/GE	Inspect placement, lift thickness and compaction of controlled fill.
		Test density of each lift of fill by nuclear methods (ASTM D2922)
		Verify extent and slope of fill placement.
Deep Foundations		N/A
	PE/GE	
4. Load Testing		
4. Other:		

CASE Form 101 • Statement of Special Inspections • ©CASE 2004

#### Cast-in-Place Concrete

Page of

Item	Agency # (Qualif.)	Scope
1. Mix Design	Agency 4  ACI-CCI ICC-RCSI	Review concrete batch tickets and verify compliance with approved mix design. Verify that water added at the site does not exceed that allowed by the mix design.
2. Material Certification	Agency 4	Verify material certifications conform to specification requirements.
3. Reinforcement Installation	Agency 3 or 4  ACI-CCI ICC-RCSI	Inspect size, spacing, cover, positioning and grade of reinforcing steel. Verify that reinforcing bars are free of form oil or other deleterious materials. Inspect bar laps and mechanical splices. Verify that bars are adequately tied and supported on chairs or bolsters
Post-Installed Anchors	Agency 3 ICC-PCSI	Inspect size, spacing and installation. Inspect per IBC section 1705.1.1 and ACI 318: 17.8.2.4.
5. Welding of Reinforcing	N/A	N/A
6. Anchor Rods (Continuous)	Agency 3 or 4	Inspect size, positioning and embedment of anchor rods. Inspect concrete placement and consolidation around anchors. Verify that concrete is properly consolidated.
7. Concrete Placement (Continuous)	Agency 3 or 4  ACI-CCI ICC-RCSI	Inspect placement of concrete. Verify that concrete conveyance and depositing avoids segregation or contamination. Verify that concrete is properly consolidated.
Sampling and Testing of Concrete	Agency 4  ACI-CFTT  ACI-STT	Test concrete compressive strength (ASTM C31 & C39), slump (ASTM C143), air-content (ASTM C231 or C173) and temperature (ASTM C1064).
9. Curing and Protection	Agency 3 or 4  ACI-CCI ICC-RCSI	Inspect curing, cold weather protection and hot weather protection procedures.
10. Batching Plant	Agency 4	Verify submitted batch plant certification conforms to specification and ACI requirements.
Formwork Installation     Shoring and Reshoring     (Periodic):	Agency 3	Confirm adequacy; verify conformance with approved submittals

CASE Form 101 • Statement of Special Inspections • ©CASE 2004

#### Quality Assurance Plan

Quality Assurance for Seismic Resistance

Seismic Design Category

Quality Assurance Plan Required (Y/N)

Description of seismic force resisting system and designated seismic systems: 1. Ordinary Reinforced Concrete Shear Walls

## Quality Assurance for Wind Requirements

Basic Wind Speed (3 second gust) 116 mph Wind Exposure Category Quality Assurance Plan Required (Y/N)

Description of wind force resisting system and designated wind resisting components: 1. Ordinary Reinforced Concrete Shear Walls

Statement of Responsibility Each contractor responsible for the construction or fabrication of a system or component designated above

must submit a Statement of Responsibility.

CASE Form 101 • Statement of Special Inspections • ©CASE 2004

#### Qualifications of Inspectors and Testing Technicians

The qualifications of all personnel performing Special Inspection and testing activities are subject to the approval of the Building Official. The credentials of all Inspectors and testing technicians shall be provided if

#### Key for Minimum Qualifications of Inspection Agents:

When the Registered Design Professional in Responsible Charge deems it appropriate that the individual performing a stipulated test or inspection have a specific certification or license as indicated below, such designation shall appear below the Agency Number on the Schedule.

Structural Engineer – a licensed SE or PE specializing in the design of building structures PE/GE Geotechnical Engineer – a licensed PE specializing in soil mechanics and foundations Engineer-In-Training – a graduate engineer who has passed the Fundamentals of Engineering examination

#### American Concrete Institute (ACI) Certification

ACI-CFTT Concrete Field Testing Technician - Grade 1 Concrete Construction Inspector Laboratory Testing Technician - Grade 1&2 Strength Testing Technician

#### American Welding Society (AWS) Certification

AWS-CWI Certified Welding Inspector AWS/AISC-SSI Certified Structural Steel Inspector

#### American Society of Non-Destructive Testing (ASNT) Certification

ASNT Non-Destructive Testing Technician – Level II or III.

## International Code Council (ICC) Certification

ICC-SMSI Structural Masonry Special Inspector ICC-SWSI Structural Steel and Welding Special Inspector ICC-SFSI Spray-Applied Fireproofing Special Inspector

## Reinforced Concrete Special Inspector

Prestressed Concrete Special Inspector

National Institute for Certification in Engineering Technologies (NICET) Concrete Technician - Levels I, II, III & IV

#### Soils Technician - Levels I, II, III & IV NICET-GET Geotechnical Engineering Technician - Levels I, II, III & IV

Exterior Design Institute (EDI) Certification EDI-EIFS EIFS Third Party Inspector

ICC-PCSI

#### NOTES THIS SECTION:

- 1. NUMBER OF CONDUITS AS REQUIRED FOR THE APPLICATION.
- 2. P SUBSCRIPT ELECTRICAL POWER OR CONTROL CONDUIT.
- 3. C SUBSCRIPT COMMUNICATION (TELEPHONE, DATA, INSTRUMENTATION CONDUIT.

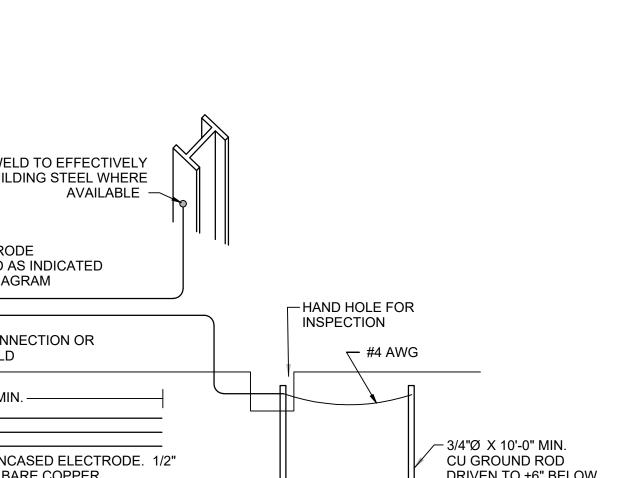

#### NOTES THIS DETAIL:

- 1. COMBINED EQUIPMENT LOADS PER 36" SPAN SHALL NOT EXCEED 500LBS.
- 2. MODULAR STRUCT WIDTH: 1 5/8".
- 3. RACK ASSEMBLY MATERIAL: GALVANIZED PER SPECIFICATION SECTION 26.
- 4. REPAIR CUT ENDS AND DAMAGED SURFACES IN ACCORDANCE WITH SPECIFICATION SECTION 05.

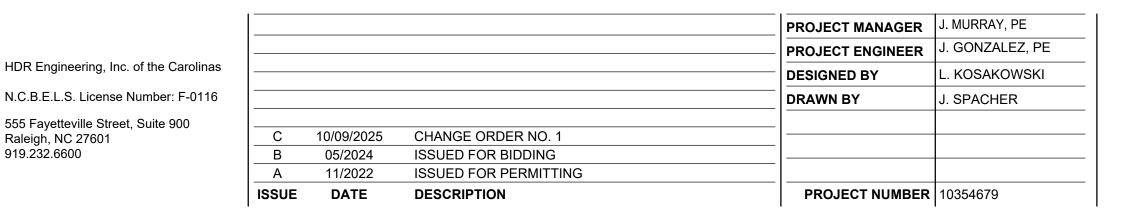

NOT TO SCALE
