Subject: Repair Application

Mr. Groefsema,

I visited your site on July 17, 2018 based on a repair application you submitted. It was determined that your drain lines were clogged near some trees. Bypassing the clogged section with approved piping should bring your system back to functioning properly. You can have any licensed septic contractor assist you with this. Please feel free to contact me with any questions or concerns.

Thank you,

Oliver Tolksdorf REHS
