Risk-based Assessment and Corrective  
Action for Petroleum Underground  
Storage Tanks

NCDOT ROW Tank Removal – Parcel 29, Carrie Bullard Property  
4798 NC 55 W, Angier  
Harnett County  
Risk Classification: Low

Dear Mr. Haden:

The Underground Storage Tank Closure Report received by the UST Section, Division of Waste Management, Wilmington Regional Office on January 9, 2023, has been reviewed. The review indicates that after tank closure soil contamination does not exceed the applicable TPH standards.

The UST Section determines that no further action is warranted. This determination shall apply unless the UST Section later finds that contamination at the site poses an unacceptable risk or a potentially unacceptable risk to human health or the environment. Pursuant to Title 15A NCAC 02L .0407(a) you have a continuing obligation to notify the Department of any changes that might affect the risk.

This No Further Action determination applies only to the current investigation; for any other incidents at the subject site, the responsible party must continue to address contamination as required.

If you have any questions regarding this notice, please contact me at the address or telephone number listed below.

Sincerely,

A handwritten signature in cursive script that reads "Liz Price".
