HORIZON DEPTH DEPTH OF FILL

In inches below natural soil surface In inches from land surface

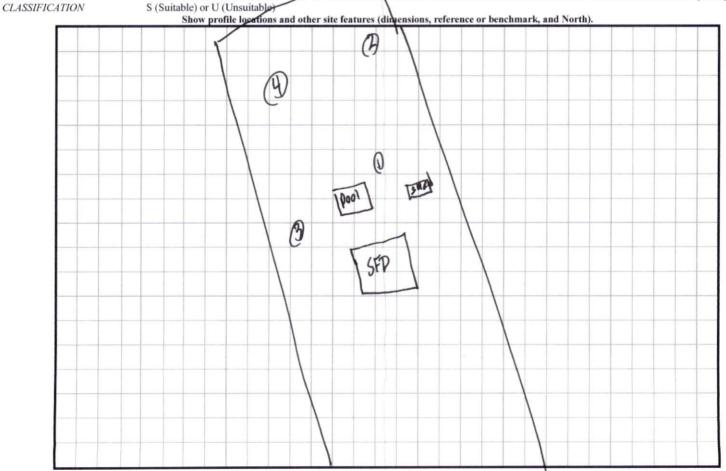

RESTRICTIVE HORIZON

Thickness and depth from land surface

SAPROLITE SOIL WETNESS

S(suitable) or U(unsuitable); Evaluation of eaprolite shall be by pits.

Inches from land surface to free water or inches from land surface to soil colors with chroma 2 or less - record Munsell color chip designation

<sup>\*</sup> Adjust LTAR due to depth, consistence, structure, soil wetness, landscape, position, wastewater flow and quality.

\*\*Sandy clay loam saprolite can only be used with advanced pretreatment in accordance with 15A NCAC 18E .1200.
