PREOCCUPANCY EVALUATION REPORT

OF DRINKING WATER SUPPLY AND								
WASTEWATER FACILITIES FOR MIGRANT HOUSING								
On, as required in G.S. 95-225(c) and (d), an evaluation was conducted of the drinking water supply and								
wastewater system serving a migrant housing site composed of # of Mobile home units, # of House (s) and								
Other type of housing/describe: located at 244 Sanny Giffen LN								
Other type of housing/describe: located at 27 32 47 47 47 47 47 47 47 4								
of 30 Betts R. Holly Springs 27540								
*** PLEASE SUBMIT ONE REPORT FOR EACH SEPTIC SYSTEM ***								
PLEASE SUBMIT ONE REPORT FOR EACH SEPTIC STSTEM								
This report describes well/spring and sewage system (Use reverse for a drawing, if needed.)								
The findings of this evaluation are as follows:								
WATER SUPPLY								
Community or non-transient-non-community water system under routine surveillance of Public Water Supply Section, (yes/no) Division of Environmental Health Private Water or Non-Community System								
(yes/no)								
At the time of inspection, there wisual evidence of non-compliance with the "Protection of Water Supplies" (was/was not)								
15A NCAC 18A .1700 (attach copy of bacteriological sample). List deficiencies which were identified:								
(Use reverse if necessary)								
· · · · · · · · · · · · · · · · · · ·								
WASTEWATER FACILITIES								
Systemto approval under 15A NCAC 18A .1900, "Laws and Rules for Sewage Treatment and Disposal (subject/not subject)								
Systems." Explain, if not subject to approval								
On-Site Septic Tank System [] Chemical Portable Toilets [] Others [] Privy(ies)								
At the time of inspection, there was/was not) visual evidence of non-compliance with 15A NCAC 18A .1900 (including								
.1962) "Laws and Rules for Sewage Treatment and Disposal System." List deficiencies which were identified:								
(Use reverse if necessary)								
The wastewater system, to the best of my knowledge and belief, is sized to serve people.

DNEWBORN

Explanations of Coliform Analysis:

If coliform bacteria are Absent, the water is considered safe for drinking purpose. If coliform bacteria are Present, the water is considered unsafe for drinking purpose. Presence of E. coli (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.

PRIVATE WELL WATER	IS RESULTS AND RECOMMENDATIONS FOR USES OF YOUR (These recommendations are based on biological analysis only.)
including drinking, cookin	a were found in your well water. Your water can be used for all purposes g, washing dishes, bathing and showering.
bacteria that are (with few viruses, known as pathoge total coliforms a useful inc	eria were detected in your water sample. Total Coliform are a group of related exceptions) not harmful to humans. A variety of bacteria, parasites, and ns, can potentially cause health problems if humans ingest them. EPA considers dicator of other pathogens for drinking water. Total coliforms are used to water treatment and the integrity of the distribution system
It is recommended	that your well water be re-tested to verify that the result is accurate.
Fecal coliform bact washing dishes, bathing of	eria were detected in the sample. Do not use the water for drinking, cooking, or showering.

If the re-test shows contamination by bacteria contact your local health department for assistance. There may be a problem with the construction of the well, the groundwater source, or operation of the well. The well needs to be inspected by the local health department or a local well contractor to determine the problem with the well and to give guidance on how to correct the problem.

Your well water was tested for biological contaminants (total coliform and fecal coliform bacteria). The results were evaluated using the federal drinking water standards.

Drinking water may contain substances that can occur naturally in water or can be introduced into water from man-made sources. Total coliform bacteria are found in soil and fecal coliform bacteria are found in animal and human waste. Total coliform or fecal coliform bacteria in well water indicate that the well may have structural problems or that the well was not properly disinfected.

If you have been drinking the well water and are pregnant, nursing, have a child in the household under 5 years of age, or immunocompromised (such as an individual with AIDS, cancer, hepatitis, dialysis or surgical procedures) inform your physician of these results at your next visit.

If the contamination continues, you should investigate the possibility of drilling a new well or installing a point-of-entry disinfection unit which can use chlorine, ultraviolet light, or ozone.

For further information please contact your county health department or the Occupational and Environmental Epidemiology Branch at 919-707-5900.
