Dear Amanda,

Please find enclosed a residential land use application for 115 Squire Street, Fuquay Varina. We purchased the property in November of last year and just moved in a week and a half ago. The purpose of this application is to remove and replace a portion of the EZ Flow septic system as shown on the enclosed drawing to allow us to put in a 15' x 32' concrete patio off the back of our house. Please review attached drawings. We had Alex Adams, a soil scientist, come out to our house when we purchased the property last November. He had done some preliminary testing and mentioned he felt we had more than enough of the EZ Flow leach field to handle the removal of these three lengths of EZ Flow and still meet the required specifications for the size of our house but that is, of course, left up to your discretion.

I have reached out to Alex since we moved in and he will be coming out to verify what we discussed last November and write up his analysis the week of August 18th. I will get that to you as soon as I receive it.

Thank you for your consideration,

Thomas Moore
