Preassembled, Easy to Install and Cyanuric Acid-Free

THE VERSACHLOR® EASY FEED FULLY-ASSEMBLED SYSTEM III

For larger pools, everything from delivering predictable chlorine levels to installing, maintaining and operating the chlorination system just got easier with the new *VersaChlor System III*.

The System III comes factory-assembled and ready for dealer installation. It is pre-plumbed atop a compact, elevated aluminum frame making final plumbing connections quick and easy. The System III works with any swimming pool controller and its new modular design incorporates an inlet/outlet bypass valve that facilitates cleaning for low-maintenance operation.

Additionally, the System III eliminates over-stabilization associated with Trichlor systems and has many advantages over liquid bleach, including lower acid consumption and no spill containment requirements.

FEATURES

• eZ Clean Bypass Loop

The eZ cleaning loop makes it almost effortless to deep clean all the system components by simply turning a few valves and automatically creating a contained cleaning loop.

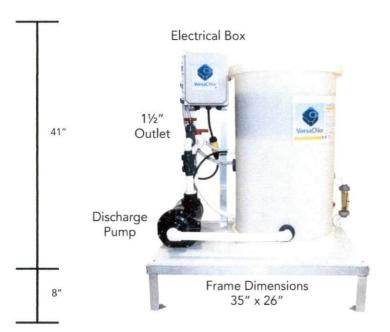

eZ-Out Sieve Plate Basket

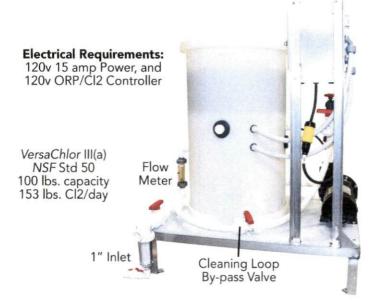

The top of the sieve plate is also the basket that holds the VersaChlor tablets. No need to remove tablets by hand any more. Just remove the eZ-Out Sieve Plate Basket and you have immediate cleaning access.

ENGINEERED FOR HMAC POOLS UP TO:

- 300,000 gallons (outdoor stabilized)
- 150,000 gallons (outdoor unstabilized)

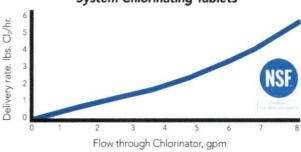

VersaChlor Tablets

VersaChlor calcium hypochlorite cubes are specially engineered and independently tested by the labs at NSF International to work in VersaChlor easy feed chlorinators in accordance with NSF/ANSI Standard 50. The tablets undergo a multi-step manufacturing and quality control process to ensure they will not soften, break apart or clog the system. VersaChlor cubes contain a scale inhibitor for clean chlorinator operation.

Note: Also NSF/ANSI 60 listed for areas requiring this listing.

Delivery Rate – VersaChlor® Easy Feed Chlorination System III(a) Using VersaChlor® System Chlorinating Tablets

Simple to Install and Easy to Operate

6 inch	60 inch (10 x 6")	24 inch (4 x 6")

Mounting location

- · The meter is designed to withstand outdoor conditions.
- F series meters must be mounted at the vertical (twelve o'clock) position on horizontal pipe only.
- U & D series meters must be mounted on vertical pipe only.
- The pipe must be completely full of water at all times.
- · See the minimum straight length of pipe requirement chart above.
- The meter can accurately measure flow from one direction only.
- U-series meters measure upward flows only.
