Dear Mr. Torres,

The application and site plan for the above referenced mobile food unit has been reviewed and is disapproved at this time. Please provide the following:

1. Application must be filled out completely. Refer to attached application and complete those items on application that are blank.
2. Food process sheets for some food items were difficult to read and understand. Food process sheets missing for menu items. Also, please refer to the food process sheet directions and questions on the application when providing information about the food items. Do you intend to offer chips and queso? If so, add these to the menu and provide a food process sheet for each.
3. You indicated on the application rice will be hot held prior to serving. Indicate where rice is stored hot prior to serving.
4. Indicate where potable water source is located at commissary. Exterior source of potable water requires a covered, protected faucet. The location of wastewater disposal cannot be used for getting the potable water.
5. Do you intend to offer drinks? If so, provide a list of drinks on the menu and describe, canned, bottled, etc.? Provide specifics on location and equipment for drink storage.
6. LP tank inspection required for mobile food unit. Link to application was provided through email.

The plans and specifications were reviewed using 15A NCAC 18A .2600 *Rules Governing the Protection and Sanitation of Food Establishments* and the 2017 *North Carolina Food Code Manual*.

If you have questions, please call me at (910) 893-7547 or email me at jturlington@harnett.org.

Thank you,
Jamie Turlington, REHS
