Subject: The Perk on Broad

Good afternoon. I received your updated application and floor plan today. I have a few items I need before I can proceed with the plan review:

1. Provide equipment specification sheets for each piece of equipment.
2. There are no utensil washing or storage equipment shown on the plan.
3. There is no dry storage space indicated on the plan.
4. You did not indicate the manufacturer and model of the water heater on the application.
5. On the application you stated that the soup would be purchased from local restaurants. Who are the suppliers and how will the soup be purchased and transported to your facility.
6. Will you buy bulk meat and slice on site or will it be pre-sliced?
7. Is there a designated food preparation sink to wash fruits and vegetables?
8. You indicated that you will provide an AutoChlor single-rack dishwasher. Provide specification sheet for the dishwasher.
9. All air-drying shelving must be labeled on the floor plan.
10. Provide a floor plan showing mechanical, plumbing and lighting.
11. Show a site plan showing the can wash and dumpster areas.
12. Your application did not indicate the number of seats, facility total square feet or the projected start date.

Please provide me with the requested information so that I can move forward with the review.
