

## COMMENTS:

1/24/2014 Jack called & said he spoke with Gerald Temple about replacing valves on the lines that are failing. He also stated that they have the grease trap cleaned 3X/year.

Letter signed for on 1/24/14

2/4/2014 Spoke with Jack, he stated that some of the valves on the main fold had been changed out & that things were working fine

## COMMENTS:

3/28/2012 Bm Met with Jack + Otis Strickland (septic contractor). The beginning of each line was uncovered on the 1st Field + we ran the pump, only lines 1, 3, 5 were getting effluent.

3/29/2012 Jack left me a message that all of the valves on the main field had been replaced + that 5 of them were clogged with grease.

4/2/2012 Met with Jack + he showed me where the supply line to the 2nd Field was disconnected + all ~~effluent~~ effluent will be going to the 1st field. No more need for pump + haul, he will be able to use the septic system on a normal basis.

5/14/2012 Bm + OT Site visit made, drain field OK

10/15/2012 Bm site visit made, drain field OK

1/13/2014 Bm site visit made, 3 lines are failing

1/17/2014 Bm + OT site visit made, we ran the pump + sewage surfaced in less than 1 min. - 2 min

1/22/2014 Bm I spoke with Jack about the failing drain field. He gave me the ok for the issue a repair permit to go in between the existing lines. He also stated that he wanted to explore the option of seeing if the other lines in the field were clogged with grease. I told him to have the tanks pumped out, + ~~reinspect~~ I did remind him that if this is not corrected by 2/18/14 the grill's permit would be suspended.

## COMMENTS:

BM+OT site visit made on 2/24/2012. 1st repair drain field still failing with on lines 3 & 5. Opened valves for lines 1, 2, & 7 which were closed. Closed valve for line 5. Valve for line 3 is broken, could not cut it off.

BM+OT site visit made 2/27/2012 both field still failing

Bm left message for Jack at the store to call me

Bm 3/1/2012 spoke w/ Jack about sending him another letter w/ options for the septic failure

BM+OT made site visit to both drain field the 1st ~~one~~ field had sewage on the surface

Bm 3/9/2012 spoke with Jack about options & set up a meeting for Tuesday afternoon 3:00 3/13/2012.

BM+GG 3/13/2012 Met with Jack & Edward (runs grill) at store about options for repairing septic system. will make another visit 3/16/2012

Bm 3/14/2012 spoke

Bm 3/20/2012 spoke w/ Jack about snaking 1st drain field lines or going in between the lines w/ new lines
