SIZE OF LOT OR TRACT

Type of dwelling Modular Mobile Home Stick Built Other

Number of bedrooms 1 2 3 4 or more - Basement with plumbing Yes No

Garage Yes No - Dishwasher Yes No - Garbage Disposal Yes No

Water Supply: Private Well Community System County

Directions from Lillington to your site:

401 S from Lillington to ELLIOT BRIDGER, TURN RIGHT 60 THREE MILES
TO TRADE WINDS SUBDIVISION, Turn Right into Riverwind DR it will be 4th house on
Right

In order for Environment Health to help you with your repair you will need to comply by doing the following:

1. A surveyed and recorded map and deed to your property must be attached to this application along with a site plan showing (a) location of dwelling (b) location of driveway (c) location of any wells and other existing structures.
2. The outlet end of the tank and distribution box will need to be uncovered and property lines marked. After the tank is uncovered, property lines are marked and orange sign has been placed, you will need to call us at 893-7547 or 893-7548 to let us know that it is ready.
3. The system must be repaired within 30 days or the set time within receipt of a violation letter.

This certifies that all of the above information is correct to the best of my knowledge. False information will result in the denial of the permit. The permit is subject to revocation if the site plan, intended use, or ownership change.

HOMEOWNER INTERVIEW FORM

It is important that you answer the following questions for our inspectors. Please do not leave any blanks if possible and answer all questions to the best of your ability. Thank you.

Installer of system vance Johnson Plumbing co.
Septic Tank Pumper _____
Designer of System _____

1. Number of people who live in house? 3 How many adults 2 How many children 1
2. What is your average estimated daily water usage? _____ gallons
3. If you have a garbage disposal, how often do you use it? n/A
4. When was the septic tank last pumped? 2 weeks How often do you have it pumped? _____
5. If you have a dishwasher, how often do you use it? daily
6. Do you have a washing machine? yes How often do you use it? daily
7. Do you have a water softener or treatment system? Yes No Where does it drain? _____
8. Do you use an "in tank" toilet bowl sanitizer? Yes No
9. Are you or any family member using long term prescription drug(s), antibiotics or chemotherapy? Yes No
If yes, please list _____
10. Do you put household cleaning chemical down the drain? Yes No If so, what kind? _____
11. Have you put any chemicals (paints, thinners, etc.) down the drain? Yes No If yes, what kind? _____
12. Have you installed any water fixtures since your system has been installed? Yes No
If yes, please list any additions including any spas, whirlpools, sinks, lavatories, bath/showers, toilets. _____
13. Do you have an underground lawn watering system? Yes No
14. Has any work been done to your structure since your initial move, such as roof, gutter drains, basement foundation drains, landscaping, etc.? Yes No If yes, please list _____
15. Are there any underground utilities on your lot? Yes No
Please check which type: Power Phone Cable Gas Water
16. Describe what is happening when you have problems with your septic system and when it was first noticed. Septic tank fills up - toilets bubble and back-up.
we had tank drained several times and had the junction box looked at. we were informed we need "newlines" and lines extended.
17. Do you notice the problem as being patterned or linked to a specific event (i.e., wash clothes, heavy rains, household guest)? Yes No If yes, please list washing clothes & dishwasher use

State Health Officials Call for "Skeeter Defeaters" to Curtail Mosquito-Borne Diseases

RALEIGH – Paying heed to last year's late season arrival of West Nile virus, state public health officials are urging all state residents to become "Skeeter Defeaters" by taking steps to eliminate mosquito breeding grounds, reduce unnecessary exposure to mosquito bites, and report dead or dying birds.

"We have adopted the term 'Skeeter Defeater' as a way to help raise public awareness," Nolan Newton, NC Public Health Pest Management Section Chief said. "We want people to know that, by taking specific precautions, they can help protect themselves from our state's more traditional mosquito-borne viruses as well as West Nile virus, which was found last year in a Chatham County crow. Working together, we can reduce exposures and fully enjoy our traditional outdoor activities."

While Eastern Equine Encephalitis (EEE) and LaCrosse Encephalitis are well established in North Carolina, West Nile virus is new to the state. In preparing for West Nile virus, state health officials have increased surveillance efforts for mosquito-borne disease. Like EEE, West Nile virus is transmitted to humans when a mosquito that has bitten an infected wild bird then bites a person.

Key to state and local efforts to monitor for the disease and to reduce mosquito populations is citizen participation, Dr. Newton said. Tar Heel residents can help monitor for West Nile virus by reporting dead birds – especially crows, blue jays and hawks – to their local health departments or the Public Health Pest Management Section at 1-877-790-1747 or via e-mail at NCWNV@NCmail.net. An online form for reporting dead birds is also available at www.deh.enr.state.nc.us/phpm/deadbirform/index.html.

Only bird carcasses that are whole, appear to be less than 36 hours old, do not have an odor, and do not have maggots inside or outside of the bird should be reported. Collection of bird carcasses for testing may cease once the virus has been detected in a specific area.

Residents can also help eliminate potential mosquito breeding grounds. Given the warming weather and recent rainfall, it is likely that conditions will soon favor mosquito hatchings. By throwing away or emptying anything that can hold water, such as tires, flower pots, and bottles, residents can reduce mosquito populations around their homes and work places. Gutters should be kept clean and in good repair. Leaky outdoor faucets should be repaired and the water in bird baths and pet bowls should be emptied at least twice a week.

Once mosquitoes arrive, bites can be prevented by wearing long sleeves and pants with the legs tucked into socks. Use a repellent containing low concentrations of DEET (10 percent or less for children; 30 percent or less for adults), following the manufacturer's instructions. Avoid outdoor activities in the evening, when mosquitoes are most active. Use screened windows and doors and make sure screens fit tightly and are not torn.

For more information about mosquitoes and mosquito-borne disease, see the Public Health Pest Management section's Web site at www.deh.enr.state.nc.us/phpm/pages/index.htm.
