Attention: Mr. Graham Byrd

Reference: Starwood At Overhills - Phase One  
Preliminary Soil Investigation

Dear Mr. Byrd,

A preliminary soils investigation has been completed for the above referenced lots, located on the east side of NC 87, Anderson Creek Township, Harnett County, North Carolina. The purpose of the investigation was to determine the lots' ability to support subsurface sewage waste disposal systems. All ratings and determinations were made in accordance with "Laws and Rules for Sanitary Sewage Collection, Treatment and Disposal, 15A NCAC 18A .1900".

The lots are dominated by soils that are rated as suitable or provisionally suitable for conventional septic systems. Unsuitable soils were encountered in the lower elevations of the property due to soil wetness and on the steep slopes located in the southeast corner of the property due to soil depth. The lots appear to have adequate usable area to support one septic system and repair area.

I trust that this report provides the information that you require at this time. If you have any questions or need additional information, please contact me at your convenience.

Sincerely,

*Hal Owen*
