Bm 3/15/2012 Met with Mr. Best at 1233 Weeks Rd.

Sewage backing up in tank. Mr. Best stated that when he uncovered the D-Box that it was falling apart. It was not uncovered when I made the visit. I told Mr. Best that the d-Box could be replaced with no permit issued. I also told him if he had only one drainline he could run solid pvc from the tank to the existing drainline. If there were multiple lines he would need a D-Box. I told Mr. Best that if that did not solve the problem to call me & I would go back & layout with flags new lines & then write him a permit

Bm 3/20/2012 Spoke with Mr. Best, he said he needs new drainlines
