**Meador Residence**  
92 Gill Lane,  
Fuquay Varina, NC 27526  
9.81 kW Solar Electric System

Dear Sirs,

After completion of the solar installation at the above referenced location, we have made a final inspection of the system. We have determined that the structural components of the solar system have been installed in accordance with the plans and specifications designed by Cape Fear Solar Systems as submitted with the permit. The design included a determination as to the adequacy of the existing roof structure to support the additional loads imposed by the solar system. The structural components of the solar panel system and the ability of the roof system to adequately support the additional load meets the requirements of the North Carolina Building Code and is ready for final approval by the owner and local building authority.

Yours Very Truly,

Glenn A. Davis, P.E.  
Engineering Manager
