Titan Solar Power NC:

At the request of Titan Solar Power NC, an agent of Structural Capacity, PC (SCPC) made a site visit to observe solar panel installation on February 01, 2022, at the above noted site. Engineerinc IO provided a structural letter, dated October 11, 2021, detailing installation requirements to meet loading requirements in accordance to the 2018 North Carolina Residential Code.

The PV equipment structural installation has been designed and inspected. The equipment installation will not create a negative impact on the building's structural design, including any additional load imposed (dead, snow, wind) and the installation is in compliance with the North Carolina Residential Code.

If there are any questions, feel free to contact me directly.

Sincerely,

Structural Capacity, PC

Adrian S. Durham, PE, SE
