

To Whom It May Concern:

Power Home Solar, LLC dba Pink Energy requests that all AHJs, utility companies, and equipment manufacturers authorize Goodleap-hired contractors to complete necessary work on the specific solar projects initiated by Pink Energy. Necessary work includes, but is not limited to, additional construction, repairs, re-permitting, inspections, permission to operate, enabling system monitoring, etc. Power Home Solar, LLC dba Pink Energy no longer has the ability to service its customers. It is our understanding that Goodleap has partnered with a few select installers to help get any remaining systems for which work remains to be fully functioning. On those specific contracts, please allow any work previously performed by Power Home Solar, LLC dba Pink Energy to be finished by the select group of installers Goodleap has partnered with.

Sincerely,

Kevin Klink, CMO
Power Home Solar, LLC dba Pink Energy
