Re: Engineering Services (Post Installation)
Richards Residence
19 Kentucky Derby Lane, Lillington, NC

To Whom It May Concern:

Pursuant to your request, we have reviewed the installation of the above-referenced solar panel system. The initial structural assessment of the proposed solar panel installation which included, the adequacy of the connections for this system and the maximum spacing of the connections was prepared by Benson Design Group of Charlotte, NC, dated February 13, 2022. This installation was inspected and found to be in compliance with the layout plan as specified in our report, product installation criteria, and the requirements of the current building code. We have determined that the equipment will not create a negative impact on the building's structural design, including any additional loads imposed (dead, snow, wind).

This letter pertains only to the panel support attachments to the roof framing and not the engineered photovoltaic panel products, components, or electrical-related installations/connections.

Should you have any questions regarding the above or if you require additional information do not hesitate to contact me.

Very truly yours,

Scott E. Wyssling, PE
