RE: Solar PV System
Vic & Karen Kaspar Residence
494 Hobson Rd
Dunn, NC 28334

Dear Inspector:

Please consider this as a statement by Jeffrey A. Torres, P.E. for the referenced project above.

Based upon my review, it is my conclusion that the installation of the solar panels on the existing roof occurred in accordance with the structural requirements of the North Carolina Building Code, 2018 Edition (2018 IBC), the original requirements in the solar related engineering documents prepared by myself and per my directive. No existing or new damage to the structural elements of the building were observed and measures have been taken to waterproof all roof penetrations. This letter does not waive the installer of any responsibility for improper installation and this letter does not express or imply a warranty.

We hope this meets your needs. If you have any questions or require additional information, please feel free to contact the office at 407-710-1147.

Respectfully Submitted,

Jeffrey A. Torres P.E.
