> Re: Engineering Services King Residence 154 Southern Place, Lillington NC 12.400 kW System

To Whom It May Concern:

We have received information regarding solar panel installation on the roof of the above referenced structure. Our evaluation of the structure is to verify the existing capacity of the roof system and its ability to support the additional loads imposed by the proposed solar system.

### A. Site Assessment Information

- 1. Site visit documentation identifying attic information including size and spacing of framing for the existing roof structure.
- Design drawings of the proposed system including a site plan, roof plan and connection details for the solar panels. This information will be utilized for approval and construction of the proposed system.

### B. Description of Structure:

Roof Framing:Prefabricated wood trusses at 24" on center. All truss members are<br/>constructed of 2x6 dimensional lumber.Roof Material:Composite Asphalt Shingles<br/>26 degreesAttic Access:Accessible<br/>Permanent

- C. Loading Criteria Used
  - Dead Load
    - Existing Roofing and framing = 7 psf
    - New Solar Panels and Racking = 3 psf
    - TOTAL = 10 PSF
  - Live Load = 20 psf (reducible) 0 psf at locations of solar panels
  - Ground Snow Load = 15 psf
  - Wind Load based on ASCE 7-10
    - Ultimate Wind Speed = 120 mph (based on Risk Category II)
    - Exposure Category C

Analysis performed of the existing roof structure utilizing the above loading criteria is in accordance with the North Carolina Residential Code (2018), including provisions allowing existing structures to not require strengthening if the new loads do not exceed existing design loads by 105% for gravity elements and 110% for seismic elements. This analysis indicates that the existing framing will support the additional panel loading without damage, if installed correctly.

### D. Solar Panel Anchorage

- 1. The solar panels shall be mounted in accordance with the most recent Unirac installation manual. If during solar panel installation, the roof framing members appear unstable or deflect non-uniformly, our office should be notified before proceeding with the installation.
- 2. The maximum allowable withdrawal force for a <sup>5</sup>/<sub>16</sub>" lag screw is 235 lbs per inch of penetration as identified in the National Design Standards (NDS) of timber construction specifications. Based on a minimum penetration depth of 2½", the allowable capacity per connection is greater than the design withdrawal force (demand). Considering the variable factors for the existing roof framing and installation tolerances, the connection using one <sup>5</sup>/<sub>16</sub>" diameter lag screw with a minimum of 2½" embedment will be adequate and will include a sufficient factor of safety.
- 3. Considering the wind speed, roof slopes, size and spacing of framing members, and condition of the roof, the panel supports shall be placed no greater than 48" on centers.
- 4. Panel supports connections shall be staggered to distribute load to adjacent framing members.

Based on the above evaluation, this office certifies that with the racking and mounting specified, the existing roof system will adequately support the additional loading imposed by the solar system. This evaluation is in conformance with the North Carolina Residential Code, current industry standards, and is based on information supplied to us at the time of this report.

Should you have any questions regarding the above or if you require further information do not hesitate to contact me.

vours

Founded in 1996, REC Group is an international pioneering solar energy company dedicated to empowering consumers with clean, affordable solar power. As Solar's Most Trusted, REC is committed to high quality, innovation, and a low carbon footprint in the solar materials and solar panels it manufactures. Headquartered in Norway with operational headquarters in Singapore, REC also has regional hubs in North America, Europe, and Asia-Pacific.

# IQ8 and IQ8+ Microinverters

Our newest IQ8 Microinverters are the industry's first microgrid-forming, softwaredefined microinverters with split-phase power conversion capability to convert DC power to AC power efficiently. The brain of the semiconductor-based microinverter is our proprietary application-specific integrated circuit (ASIC) which enables the microinverter to operate in grid-tied or off-grid modes. This chip is built in advanced 55nm technology with high speed digital logic and has super-fast response times to changing loads and grid events, alleviating constraints on battery sizing for home energy systems.

Part of the Enphase Energy System, IQ8 Series Microinverters integrate with the Enphase IQ Battery, Enphase IQ Gateway, and the Enphase App monitoring and analysis software.

Connect PV modules quickly and easily to IQ8 Series Microinverters using the included Q-DCC-2 adapter cable with plug-n-play MC4 connectors.

IQ8 Series Microinverters redefine reliability standards with more than one million cumulative hours of power-on testing, enabling an industryleading limited warranty of up to 25 years.

IQ8 Series Microinverters are UL Listed as PV Rapid Shut Down Equipment and conform with various regulations, when installed according to manufacturer's instructions.

### Easy to install

· Lightweight and compact with plug-n-play connectors

DATA SHEET

- Power Line Communication (PLC) between components
- Faster installation with simple two-wire cabling

### High productivity and reliability

- · Produce power even when the grid is down\*
- More than one million cumulative hours of testing
- Class II double-insulated enclosure
- · Optimized for the latest highpowered PV modules

### Microgrid-forming

- · Complies with the latest advanced grid support\*\*
- · Remote automatic updates for the latest grid requirements
- · Configurable to support a wide range of grid profiles
- Meets CA Rule 21 (UL 1741-SA) requirements

\* Only when installed with IQ System Controller 2, meets UL 1741. \*\* IQ8 and IQ8Plus supports split phase, 240V installations only.

# Enphase **IQ Combiner 4/4C**

X-IQ-AM1-240-4 X-IQ-AM1-240-4C

To learn more about Enphase offerings, visit enphase.com

The Enphase IQ Combiner 4/4C with Enphase IQ Gateway and integrated LTE-M1 cell modem (included only with IQ Combiner 4C) consolidates interconnection equipment into a single enclosure and streamlines IQ microinverters and storage installations by providing a consistent, pre-wired solution for residential applications. It offers up to four 2-pole input circuits and Eaton BR series busbar assembly.

### Smart

- · Includes IQ Gateway for communication and control
- Includes Enphase Mobile Connect cellular modem (CELLMODEM-M1-06-SP-05), included only with IQ Combiner 4C
- · Includes solar shield to match Enphase IQ Battery aesthetics and deflect heat
- Flexible networking supports Wi-Fi, Ethernet, or cellular
- · Optional AC receptacle available for PLC bridge
- · Provides production metering and consumption monitoring

### Simple

- · Centered mounting brackets support single stud mounting
- · Supports bottom, back and side conduit entry · Up to four 2-pole branch circuits for 240 VAC
- plug-in breakers (not included) • 80A total PV or storage branch circuits

### Reliable

- Durable NRTL-certified NEMA type 3R enclosure
- · Five-year limited warranty
- · Two years labor reimbursement program coverage included for both the IQ Combiner SKU's

⊖ ENPHASE.

### NXT HORIZON COMBO CLAMP DISCOVER YOUR NXT HORIZON DARK: CCLAMPD1 MILL: CCLAMPM1 The culmination of over two decades of experience. Thoughtful design, Clicks into rail anywhere (even when there are cables!) rigorous engineering, world-class support, and a reliable supply chain are the Self-standing clamp with spring combines as both mid and end clam Clamps 30-40 mm modules foundation of what makes us confident that NXT HORIZON® is the NXT Level of DESIGN, SIMPLICITY, and VALUE. STRONGHOLD<sup>™</sup> RAIL CLAMP DARK: SHCLMPD1 1/2 inch module spacing for efficiency MILL: SHCLMPM1 Unirac-quality bonding that works both as Adaptable rail connection to attachments mid and end clamps. allows click-in feature compatibility with almost all of Unirac's attachments. WIRE MANAGEMENT OPTONS NXT HORIZON RAIL FlashLoc technology combined with new features: click-in rail & open slot L-Foot for **DARK: 168RLD1** the best flash-less install experience. MILL: 168RLM1 Strong, lightweight open channel rail with invisible, easy, unfailing STRONGHOLD" ATTACHMENT KIT and integrated wire managemen system DARK: SHCPKTD1 MILL: SHCPKTM1 Rail clicks into the clamps attached to the NXT HORIZON RAIL SPLICE Stronghold<sup>™</sup> base. Open slot in L-foot allows **NXT HORIZON MLPE & LUG CLAMP** NXT HORIZON WIRE MANAGEMENT CLIP drop-in rail clamp. **RLSPLCM1** LUGMLPE1 WRMCLPD1 Structural internal splice that does Alternative attachment options: not interfere with roof connection Works as either MLPE Mount or Grounding Aesthetic, yet functional accessory that works to nor module connection Lug connection to the rail. Why source two help installers keep wires inside the rail. Pre-assembled thread cutting bolts FLASHLOC" DUO parts when one can do the job? No zip-ties required. Optional zip tie loop for extra FLASHKIT PRO

ALL NXT HORIZON° SYSTEMS INCLUDE A FREE PERMITTING PLANSET DESIGN - FOR QUESTIONS OR CUSTOMER SERVICE VISIT UNIRAC.COM OR EMAIL NXTPERMITS@UNIRAC.COM

### **Basic Features**

- Stamped Seamless Construction
- 18 Gauge Galvanized Steel
- Powder Coated Surfaces
- Flashes into the roof deck
- 3 Roof deck knockouts .5", .75", 1"
- 5 Centering dimples for entry/exit fittings or conduit
- 2 Position Ground lug installed
- Mounting Hardware Included

SolaDeck Model SD 0783

# SolaDeck UL50 Type 3R Enclosures

Available Models: Model SD 0783 - (3" fixed Din Rail) Model SD 0786 - (6" slotted Din Rail)

## SolaDeck UL 1741 Combiner/Enclosures

Models SD 0783-41 and SD 0786-41 are labeled and ETL listed UL STD 1741 according to the UL STD 1741 for photovoltaic combiner enclosures. Max Rated - 600VDC, 120AMPS

Model SD 0783-41 3" Fixed Din Rail fastened using Norlock System \*\*Typical System Configuration

- 4- Din Rail Mounted Fuse Holders 600VDC 30 AMP
- 1- Power Distribution Block 600VDC 175AMP
- 1- Bus Bar with UL lug

Model SD 0786-41 6" Slotted Din Rail fastened using steel studs

- \*\*Typical System Configuration
- 4- Din Rail Mounted Fuse Holders 600VDC 30 AMP
- 4- Din Rail Mounted Terminal Blocks Bus Bars with UL lug

\*\*Fuse holders and terminal blocks added in the field must be UL listed or recognized and meet 600 VDC 30 AMP 110C for fuse holders, 600V 50 AMP 90C for rail mounted terminal blocks and 600 V 175 AMP 90C for Power Distribution Blocks. Use Copper Wire Conductors.

locations.

Model SD 0783-41, wired with Din Rail mounted fuse holders, bus bar and power distribution block.

Model SD 0786-41, wired with Din Rail mounted fuse holders. terminal blocks and bus bars.
