ReNu Energy Solutions:

At the request of ReNu Energy Solutions (ReNu), Structural Capacity, PC (SCPC) made a site visit to observe the solar panel installation on October 20, 2022, at the above noted site. SCPC provided a structural letter, dated October 04, 2022, "SCPC Letter" detailing installation requirements to meet loading requirements in accordance to the 2018 North Carolina Residential Code.

The PV equipment structural installation has been designed and inspected. The installation meets the criteria of the SCPC letter and therefore will not create a negative impact on the building's structural design, including any additional load imposed (dead, snow, wind). The installation is in compliance with the 2018 North Carolina Residential Code.

If there are any questions, feel free to contact me directly.
