Not necessarily. You cannot stay in an RV on property in Harnett County. So you cannot have electrical to that. I can sell you the electrical permit for power tools, fans, charging cell phones, but not for an RV. Please add these details to the application and I can sell the permit. Also add that you will not be staying in an RV.

Sincerely,

Donna M. Johnson

Yes, I currently use a generator when we are down there and it's just super loud and I'm over it. Kind of defeats the purpose of enjoying peace and quiet at our land.

Are you saying I need to have a structure on our land to justify approval to get electric there?

Chris.

Good morning, Chris. Are you pulling an RV out there to stay in when you visit? I am not quite sure why you need electrical when there is not a building of any kind out there.

Sincerely,

Donna M. Johnson

Hi Donna,

Hope you are having a nice Tuesday.

Kindly find attached the completed docs as requested. Please let me know if I missed anything or if items need to be edited.

**The electric company had already run service to the edge of our property on Susie Circle Road and we just need a couple of outlets on our land to run some of my power tools, fans, charge devices, portable AC etc.

We do not live on our land and usually visit every other weekend. We reside at Lone Pine Loop in Fuquay Varina.

Thanks.

Hi Donna

Hope you are having a nice week. Just checking in to see if there is something else I need to be doing for this permit process?

Thanks for your assistance on this.

On Thu, Jul 7, 2022 at 2:23 PM Chris F <fahy.chris@gmail.com> wrote:

Hey Donna,

Yes, I thought initially it would make the permit process easier mentioning the MH but seems this actually caused the delay, so my apologies on that.

Just for clarity, the temp pole is just to have a power source to connect/charge my power tools, large fan, cooler etc. when we are down there.

Let me know if any other info is needed on this.

Thanks again for your patience.

Oh, in the previous email you mentioned the MH being added to the temp pole.

Hi Jonna,

Correct, we recently bought the land and there are no existing structures.

This power will not be for a MH and will be used mainly to connect/charge my power tools, large fan, cooler etc.

We have a builder lined up for our eventual build but would like temp power at the land until then.

Let me know if this is allowed.

Thanks.

If this power is for a motorhome, we do not allow it. It seems on the GIS layout of the land there are no structures of any kind on that property.

Temp power would be OK. however yeah I agree that for the use of an RV wouldn't be allowed.

Hope this helps,

Please look at this. I believe this person is wanting to add this power to an RV. That is the way it looks. Brad does not care if we do a permit, but I am not sure about ya'll.

This need to be addressed by planning, if they have any questions about the fact that they can't have an RV set up on the property.

Good morning Donna and thanks for the reply.

Address is 672 Susie Circle, Cameron.

Also just to note, this temp pole would be for my power tools, fan, MH when we go down for the day but please note we would not be living in the RV. I have 5 kids and we live in Fuquay.

I'm new to all these land and permitting processes so any help is appreciated.

Thanks.

Chris.
