To Whom It May Concern:

I have observed the installation of the solar system as specified for the residence at 59 Doonbeg Drive, Fuquay Varina, NC to verify that the installation was completed correctly in accordance with the plans and specifications and that any potential alterations were acceptable.

Upon inspection, it is my recommendation that the installation of the previously designed solar system has been performed in general compliance with the applicable codes and approved permit and that it will not create a negative impact on the building's structural design including any additional loads imposed by the array.

Sincerely,  
A. Luke Rowley, PE
