Available from:

Founded in 1996, REC Group is an international pioneering solar energy company dedicated to empowering consumers with clean, affordable solar power. As Solar's Most Trusted, REC is committed to high quality, innovation, and a low carbon footprint in the solar materials and solar panels it manufactures. Headquartered in Norway with operational headquarters in Singapore, REC also has regional hubs in North America, Europe, and Asia-Pacific.

# **IQ7X Microinverter**

The high-powered, smart grid-ready IQ7X Microinverter dramatically simplifies the installation process while achieving the highest system efficiency for systems with 96-cell modules.

Part of the Enphase Energy System, the IQ7X Microinverter integrates with the IQ Gateway, IQ Battery, and the Enphase Installer App monitoring and analysis software.

The IQ Series Microinverters extend the reliability standards set forth by previous generations and undergo over a million hours of power-on testing, enabling Enphase to provide an industry-leading warranty of up to 25-years.

#### Easy to Install

- · Lightweight and simple
- Faster installation with improved, lighter two-wire cabling
- Built-in rapid shutdown compliant (NEC 2014, 2017 & 2020)

#### Efficient and Reliable

- Optimized for high powered 96-cell\* modules
- Highest CEC efficiency of 97.5%
- · More than a million hours of testing
- Class II double-insulated enclosure
- UL listed

#### Smart Grid-Ready

- Complies with advanced grid support, voltage and frequency ride-through requirements
- Remotely updates to respond to changing grid requirements
- Configurable for varying grid profiles
- Meets CA Rule 21 (UL 1741-SA) and IEEE 1547:2018 (UL 1741-SB, 3<sup>rd</sup> Ed.)

\* The IQ7X is required to support 96-cell modules.

# Enphase **Q** Cable Accessories

The Enphase Q Cable<sup>™</sup> and accessories are part of the latest generation Enphase IQ System<sup>™</sup>. These accessories provide simplicity, reliability, and faster installation times.

# 

#### Enphase Q Cable

- Two-wire, double-insulated Enphase Q Cable is 50% lighter than the previous generation Enphase cable
- New cable numbering and plug and play connectors speed up installation and simplify wire management
- Link connectors eliminate cable waste

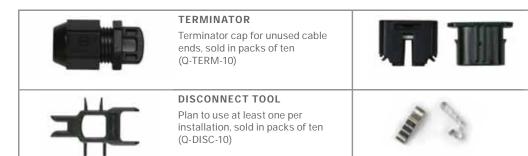

#### Field-Wireable Connectors

- Easily connect Q cables on the roof without complex wiring
- Make connections from any open connector and center feed any section of cable within branch limits
- Available in male and female connector types

#### **Enphase Q Cable Accessories**

# IQ Combiner 4/4C

XIQ-AM1-240-4 X2-IQ-AM1-240-4 (IEEE 1547:2018) The IQ Combiner 4/4C with IQ Gateway and integrated LTE-M1 cell modem (included only with IQ Combiner 4C) consolidates interconnection equipment into a single enclosure. It streamlines IQ Microinverters and storage installations by providing a consistent, pre-wired solution for residential applications. It offers up to four 2-pole input circuits and Eaton BR series busbar assembly.

#### Smart

- Includes |Q Gateway for communication and control
- Includes Mobile Connect cellular modem (CELLMODEM-M1-06-SP-05), included only with IQ Combiner 4C
- Includes solar shield to match Enphase IQ Battery aesthetics and deflect heat
- Supports Wi-Fi, Ethernet, or cellular connectivity
- Optional AC receptacle available for PLC bridge
- Provides production metering and consumption
  monitoring

#### Simple

- Mounts on single stud with centered brackets
- Supports bottom, back and side conduit entry
- Allows up to four 2-pole branch circuits for 240VAC plug-in breakers (not included)
- 80A total PV or storage branch circuits

#### Reliable

- Durable NRTL-certified NEMA type 3R enclosure
- Five-yearlimited warranty
- Two years labor reimbursement program coverage included for both the IQ Combiner SKU's
- UL listed
- X2-IQ-AM1-240-4 and X2-IQ-AM1-240-4C comply with IEEE 1547:2018 (UL 1741-SB, 3<sup>rd</sup> Ed.)

To learn more about Enphase offerings, visit <u>enphase.com</u> IQ-C-4-4C-DS-0103-EN-US-12-29-2022

# **Enphase IQ Envoy**

The **Enphase IQ Envoy**<sup>™</sup> communications gateway delivers solar production and energy consumption data to Enphase Enlighten<sup>™</sup> monitoring and analysis software for comprehensive, remote maintenance and management of the Enphase IQ System.

With integrated revenue grade production metering and optional consumption monitoring, Envoy IQ is the platform for total energy management and integrates with the Enphase Ensemble™and the Enphase IQ Battery<sup>™</sup>.

#### Smart

- · Enables web-based monitoring and control
- · Bidirectional communications for remote upgrades
- Supports power export limiting and zeroexport applications

#### Simple

- Easy system configuration using Enphase Installer Toolkit<sup>™</sup> mobile app
- · Flexible networking with Wi-Fi, Ethernet, or cellular

- Reliable
- Designed for installation indoors or outdoors
- · Five-year warranty

#### **Enphase IQ Envoy**

#### A. System Specifications and Ratings

- Maximum Voltage: 1,000 Volts ٠
- Maximum Current: 80 Amps
- Allowable Wire: 14 AWG 6 AWG
- Spacing: Please maintain a spacing of at least 1/2" between uninsulated live parts and fittings for conduit, armored cable, and uninsulated live parts of opposite polarity.
- Enclosure Rating: Type 3R ٠
- Roof Slope Range: 2.5 12:12
- Max Side Wall Fitting Size: 1"
- Max Floor Pass-Through Fitting Size: 1"
- Ambient Operating Conditions: (-35°C) (+75°C)
- Compliance:
  - JB-1.2: UL1741
  - Approved wire connectors: must conform to UL1741
- System Marking: Interek Symbol and File #5019942
- Periodic Re-inspections: If re-inspections yield loose components, loose fasteners, or any corrosion between components, components that are found to be affected are to be replaced immediately.

# **Rigid Nonmetallic Conduit** – Junction Boxes

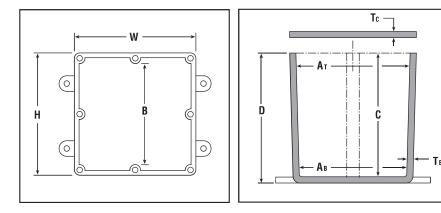

# Molded Nonmetallic Junction Boxes 6P Rated

It's another first from Carlon<sup>®</sup> - the first nonmetallic junction boxes UL Listed with a NEMA 6P rating per Section 314.29, Exception of the National Electrical Code. Manufactured from PVC or PPO thermoplastic molding compound and featuring foam-in-place gasketed lids attached with stainless steel screws, these rugged enclosures offer all the corrosion resistance and physical properties you need for direct burial applications.

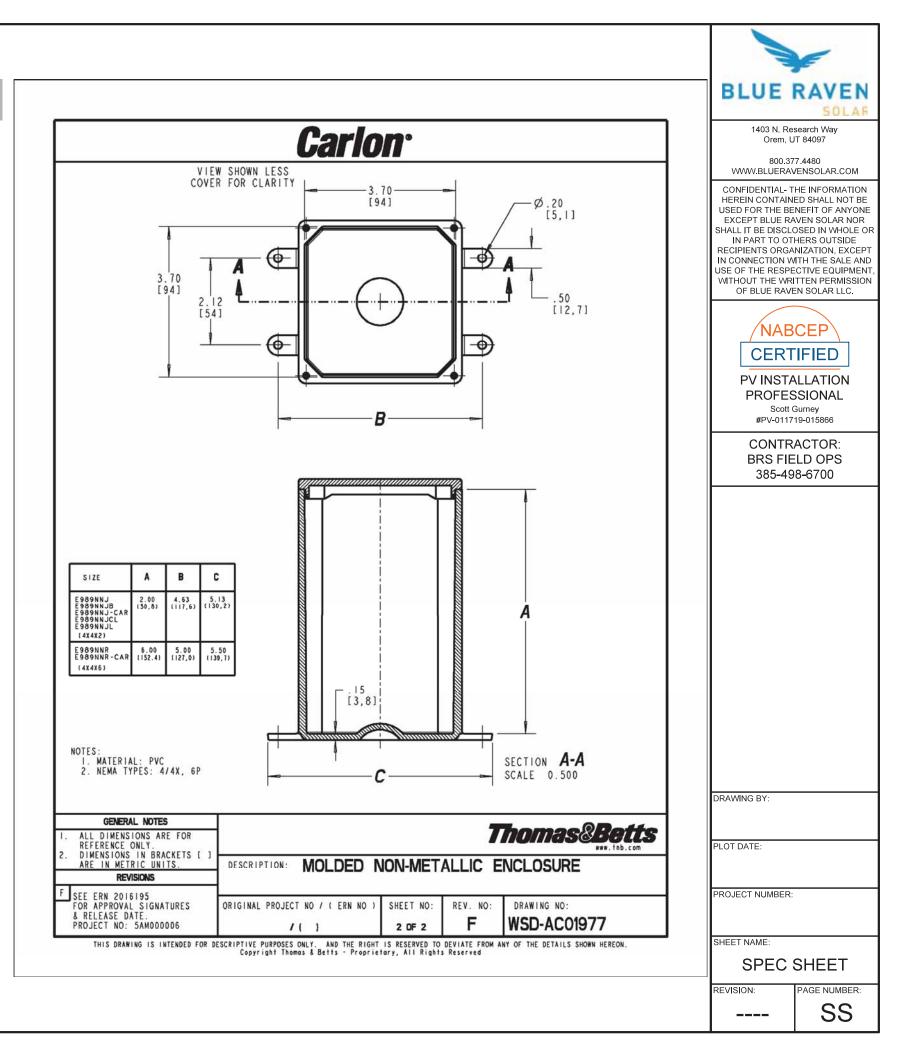

Type 6P enclosures are intended for indoor or outdoor use, primarily to provide a degree of protection against contact with enclosed equipment, falling dirt, hosedirected water, entry of water during prolonged submersion at a limited depth, and external ice formation.

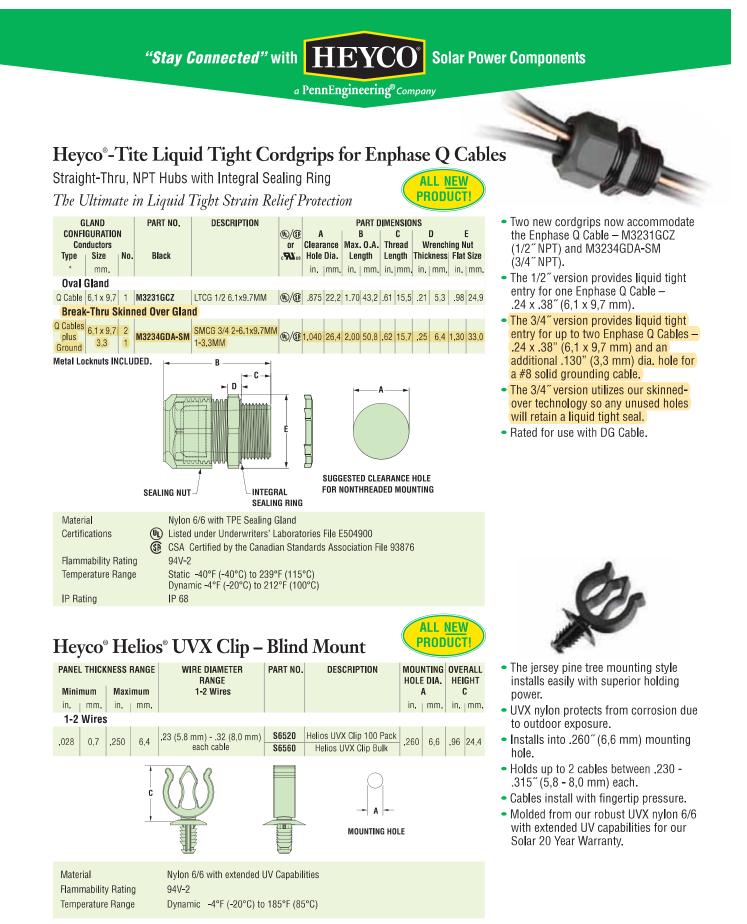

- All Carlon Junction Boxes are UL Listed and maintain a minimum of a NEMA Type 4/4x Rating.
- Parts numbers with an asterisk (\*) are UL Listed and maintain a NEMA Type 6P Rating and Type 4/4X Rating.

# **2 INSTALLS PER DAY**

Make two installs per day your new standard. **SFM** INFINITY has fewer roof attachments, one tool installation, and pre-assembled components to get you off the roof 40% faster.

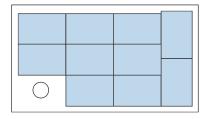

HOMEOWNERS

# **BETTER AESTHETICS**

Install the system with the aesthetics preferred by homeowners, with integrated front trim, trim end caps, dark components, and recessed hardware.

# **MAXIMUM POWER DENSITY**

Easily mix module orientations to achieve optimal power density without incurring the increased bill of materials, labor, and attachments required by rail.

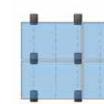

# SYSTEM OVERVIEW

PART NAME	DESCRIPTION
1 TRIMRAIL	Structural front trim provides aesthetic and aligns modules.
2 TRIMRAIL SPLICE	Connects and electrically bonds sections of <b>TRIM</b> RAIL.
3 TRIMRAIL FLASHKIT	Attaches <b>TRIM</b> RAIL to roof. Available for comp shingle or tile.
4 MODULE CLIPS	Secure modules to <b>TRIM</b> RAIL.
5 MICRORAIL	Connects modules to SLIDERS. Provides post-install array leveling.
6 SPLICE	Connects and supports modules. Provides east-west bonding. ATTACHED SPLICE also available.
<sup>7</sup> SLIDER FLASHKIT	Roof attachment and flashing. Available for comp shingle and tile.

# **BONDING AND ACCESSORIES**

PART NAME	DESCRIPTION
TRIMRAIL ENDCAPS	Covers ends of <b>TRIM</b> RAIL for refined aesthetic.
TRIMRAIL BONDING CLAMP	Electrically bonds <b>TRIM</b> RAIL and modules
N/S BONDING CLAMP	Electrically bonds rows of modules

attachments than rail systems.

	1.1	11

Install Conductor and torque to the following: 4-6 AWG: 35in-lbs 8 AWG: 25 in-lbs 10-14 AWG: 20 in-lbs

#### LUG DETAIL & TOROUE INFO Ilsco Lay-In Lug (GBL-4DBT)

- 10-32 mounting hardware
- Torque = 5 ft-lb
- AWG 4-14 Solid or Stranded

#### **TERMINAL TOROUE**, **Install Conductor and** torque to the following: 4-14 AWG: 35in-lbs

### LUG DETAIL & TOROUE INFO Ilsco Flange Lug (SGB-4)

- 1/4" mounting hardware
- Torque = 75 in-lb
- AWG 4-14 Solid or Stranded

#### WEEBLUG Single Use Only

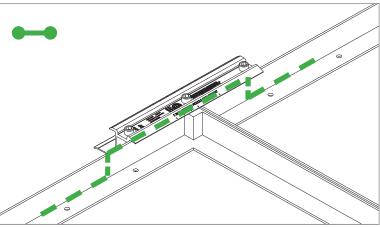

**TERMINAL TOROUE**, **Install Conductor and** torque to the following: 6-14 AWG: 7ft-lbs

#### LUG DETAIL & TOROUE INFO Wiley WEEBLug (6.7)

- 1/4" mounting hardware
- Torque = 10 ft-lb
- AWG 6-14 Solid or Stranded

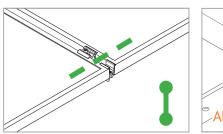

# NOTE: ISOLATE COPPER FROM ALUMINUM CONTACT TO PREVENT CORROSION

System bonding is accomplished through modules. System grounding accomplished by attaching a ground lug to any module at a location on the module specified by the module manufacturer.

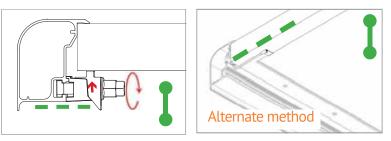

### E-W BONDING PATH:

E-W module to module bonding is accomplished with 2 pre-installed bonding pins which engage on the secure side of the MicrorailTM and splice.

### **N-S BONDING PATH:**

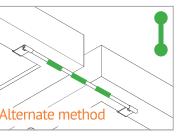

N-S module to module bonding is accomplished with bonding clamp with 2 integral bonding pins. (refer also to alternate method)

#### **TRIMRAIL BONDING PATH:**

Trimrail to module bonding is accomplished with bonding clamp with integral bonding pin and bonding T-bolt. (refer also to alternate method)

# UL CODE COMPLIANCE NOTES 20 INSTALLATION GUIDE PAGE

#### SYSTEM LEVEL FIRE CLASSIFICATION

The system fire class rating requires installation in the manner specified in the SUNFRAME MICRORAIL (SFM) Installation Guide. SFM has been classified to the system level fire portion of UL 1703. This UL 1703 classification has been incorporated into the UL 2703 product certification. SFM has achieved Class A, B & C system level performance for low slope & steep sloped roofs when used in conjunction with type 1 and type 2 modules. Class A, B & C system level fire

performance is inherent in the SFM design, and no additional mitigation measures are required. The fire classification rating is valid for any roof pitch. There is no required minimum or maximum height limitation above the roof deck to maintain the Class A, B & C fire rating for SFM. SUNFRAME MICRORAIL<sup>™</sup> components shall be mounted over a fire resistant roof covering rated for the application.

Module Type	Roof Slope	System Level Fire Rating	Microrail Direction	Module Orientation	Mitigation Rec
Type 1 and Type 2	Steep Slope & Low Slope	Class A, B & C	East-West	Landscape OR Portrait	None Require

#### **UL2703 TEST MODULES**

See pages 22 and 23 for a list of modules that were electrically and mechanically tested or qualified with the SUNFRAME MICRORAIL (SFM) components outlined within this Installation Guide.

- Maximum Area of Module = 27.76 sqft •
- UL2703 Design Load Ratings:
  - Downward Pressure 113 PSF / 5400 Pa a)
  - Upward Pressure 50 PSF / 2400 Pa b)
  - Down-Slope Load 21.6 PSF / 1034 Pa c)
- Tested Loads:
  - Downward Pressure 170 PSF / 8000 Pa a)
  - b) Upward Pressure – 75 PSF / 3500 Pa
  - Down-Slope Load 32.4 PSF / 1550 Pa c)
- Maximum Span = 6ft
- Use with a maximum over current protection device OCPD of 30A ٠
- System conforms to UL Std 2703, certified to LTR AE-001-2012
- Rated for a design load of 2400 Pa / 5400 Pa with 24 inch span
- PV modules may have a reduced load rating, independent of the SFM load rating. Please consult • the PV module manufacturer's installation guide for more information
- Down-Slope design load rating of 30 PSF/ 1400 Pa for module areas of 22.3 sq ft or less •

• Unless otherwise noted, all modules listed above include all wattages and specific models within that series. Variable wattages are represented as "xxx"

• Items in parenthesis are those that may or may not be present in a compatible module's model ID

• Slashes "/" between one or more items indicates that either of those items may be the one that is present in a module's model ID

• Please see the SFM UL2703 Construction Data Report at Unirac.com to ensure the exact solar module selected is approved for use with SFM

• SFM Infinity is not compatible with module frame height of less than 30mm and more than 40mm. See Module Mounting section, page 12 for further information

# AUTHORIZATION TO MARK

This authorizes the application of the Certification Mark(s) shown below to the models described in the Product(s) Covered section when made in accordance with the conditions set forth in the Certification Agreement and Listing Report. This authorization also applies to multiple listee model(s) identified on the correlation page of the Listing Report.

This document is the property of Intertek Testing Services and is not transferable. The certification mark(s) may be applied only at the location of the Party Authorized To Apply Mark.

Applicant: Unirac, Inc Manufacturer: 1411 Broadway Blvd NE Address: Address: Albuquerque, NM 87102 Country: USA Country: Party Authorized To Apply Mark: Same as Manufacturer **Report Issuing Office:** Intertek Testing Services NA, Inc., Lake Forest, CA Control Number: 5003705 Authorized by: for L. Matthew Snyder, Certification Manager

#### This document supersedes all previous Authorizations to Mark for the noted Report Number.

This Authorization to Mark is for the exclusive use of Intertek's Client and is provided pursuant to the Certification agreement between Intertek and Its Client. Intertek's responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this Authorization to Mark. Only the Client is authorized to permit copying or distribution of this Authorization to Mark and then only in its entirety. Use of Intertex's Certification mark is restricted to the conditions laid out in the agreement and in this Authorization to Mark. Any further use of the Interlek name for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek. Initial Factory Assessments and Follow up Services are for the purpose of assuring appropriate usage of the Certification mark in accordance with the agreement, they are not for the purposes o production quality control and do not relieve the Client of their obligations in this respect.

2.0 Product D	escription	2.0 Product De	escription
Product	Photovoltaic Mounting System, Sun Frame Microrail Installation Guide, PUB2022SEP28	Models	Unirac SFM
Brand name	Unirac	Model Similarit	y NA
Description	<ul> <li>The product covered by this report is the Sun Frame Micro Rail roof mounted Photovoltaic Rack Mounting System. This system is designed to provide bonding and grounding to photovoltaic modules. The mounting system employs anodized or mill finish aluminum brackets that are roof mounted using the slider, outlined in section 4 of this report. There are no rails within this product, whereas the 3" Micro Rail, Floating Splice, and 9" Attached Splice electrically bond the modules together forming the path to ground.</li> <li>The Micro Rails are installed onto the module frame by using a stainless steel bolt anodized with black oxide with a stainless type 300 bonding pin, torqued to 20 ft-lbs, retaining the modules to the bracket. The bonding pin of the Micro Rail when bolted and torqued, penetrate the anodized coating of the photovoltaic module frame (at bottom flange) to contact the metal, creating a bonded connection from module to module.</li> <li>The grounding of the entire system is intended to be in accordance with the latest edition of the National Electrical Code, including NEC 250: Grounding and Bonding, and NEC 690: Solar Photovoltaic Systems or the Canadian Electrical Code, CSA C22.1 Part 1 in accordance to the revision in effect in the jurisdiction in which the project resides. Any local electrical codes must be adhered in addition to the national electrical codes. The Grounding Lug is secured to the photovoltaic module, torqued in accordance with the installation manual provided in this document.</li> <li>Other optional grounding includes the use of the Enphase UL2703 certified grounding system, which requires a minimum of 2 micro-inverters mounted to the same rail, and using the same engage cable.</li> </ul>	Ratings	<ul> <li>Fuse Rating: 30A</li> <li>Module Orientation: Portrait or Landscape</li> <li>Maximum Module Size: 17.98 ft<sup>2</sup></li> <li>UL2703 Design Load Rating: 33 PSF Downward, 33 PSF Upwart</li> <li>Tested Loads - 50 psf/2400Pa Downward, 50psf/2400Pa Uplift,</li> <li>Trina TSM-255PD05.08 and Sunpower SPR-E20-327 used for N</li> <li>Increased size ML test:</li> <li>Maximum Module Size: 22.3 ft<sup>2</sup></li> <li>UL2703 Design Load Rating: 113 PSF Downward, 50 PSF Upw</li> <li>LG355S2W-A5</li> <li>used for Mechanical Loading test.</li> <li>Mounting configuration: Four mountings on each long side of pa</li> <li>UL2703 Design Load Rating: 46.9 PSF Downward, 40 PSF Upw</li> <li>LG395N2W-A5,</li> <li>LG360S2W-A5 and LG355S2W-A5 used for used for Mechanic.</li> <li>Mounting configuration: Six mountings for two modules used wit</li> <li>IEC 61646 Test Loads - 112.78 psf/5400Pa Downward, 50psf/2</li> <li>Mechanical Load test to add FlashLoc Slider and Trim Assemblic</li> <li>Certifications, &amp; Increase SFM System UL2703 Module Size:</li> <li>Maximum Module Size: 27.76 ft<sup>2</sup></li> <li>UL2703 Design Load Rating: 113 PSF Downward, 50 PSF Upw</li> <li>Jinko Eagle 72HM G5 used for Mechanical Loading test.</li> <li>Mounting configuration: Four mountings on each long side of pa</li> <li>Maximum module size: 21.86 ft2</li> <li>IEC 61646 Test Loads - 112.78 psf/5400Pa Downward, 75psf/3/</li> <li>SunPower model SPR-A430-COM-MLSD used for Mechanical L</li> <li>Fire Class Resistance Rating:</li> <li>Class A for Steep Slope Applications when using Type 1 Moduli interstitial gap.
