Re: Engineering Services (Post-Install)  
Morales Residence  
144 Smoketree Drive, Fuquay Varina, NC  
8.000 kW System

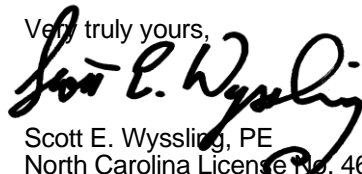

To Whom It May Concern:

Pursuant to your request, we have reviewed the installation of the above-referenced solar panel system. As you are aware, this office initially prepared a structural assessment, dated December 19, 2024, of the solar panel installation. A field inspection of the PV equipment's structural installation has been designed and inspected. The PV equipment will not create a negative impact on the building's structural design, including any additional loads imposed (dead, snow, wind). The installation is found to be in compliance with the North Carolina Residential Code.

This letter pertains only to the panel support attachments to the roof framing and not the engineered photovoltaic panel products, components, or electrical-related installations/connections.

Should you have any questions regarding the above or if you require additional information do not hesitate to contact me.

Very truly yours,

  
Scott E. Wyssling, PE
