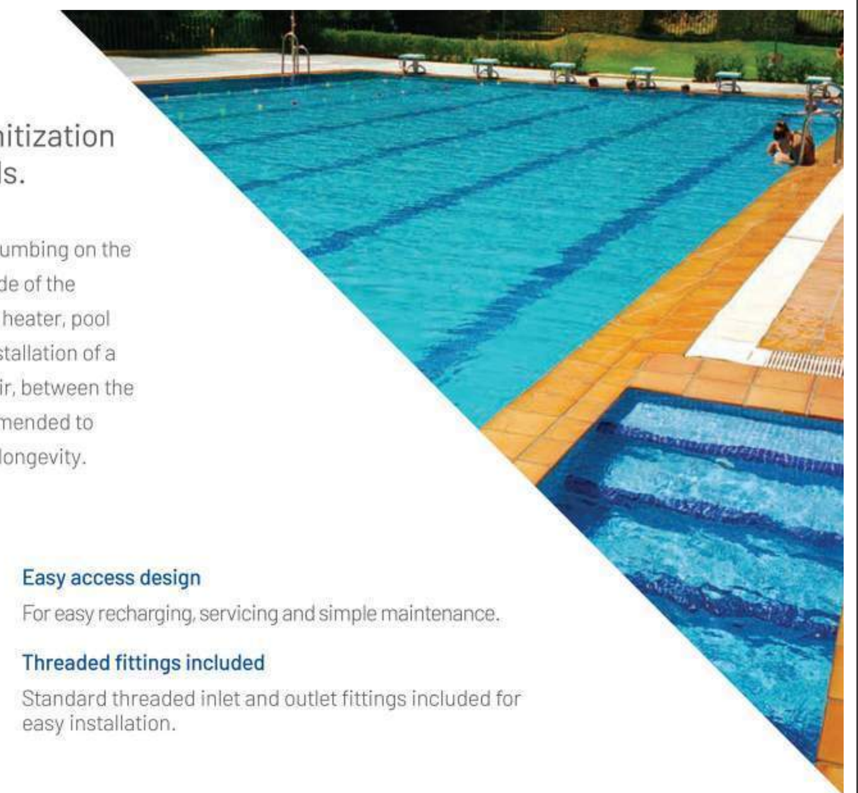
HIGH CAPACITY CHLORINE/BROMINE FEEDERS

The performance leader in automatic sanitization for large residential and commercial pools.



The INLET control valve side of the feeder connects to the plumbing on the discharge side of the pump, before the filter. The OUTLET side of the feeder connects to the pool return line after the filter and/or heater, pool cleaner, diverter valves or any other installed equipment. Installation of a corrosion-resistant check valve, such as #R172288 by Pentair, between the feeder inlet and outlet and the equipment is strongly recommended to check backflow of chemicals. This helps ensure equipment longevity.

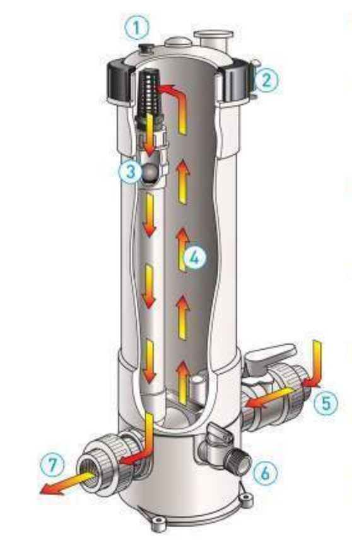
KEY FEATURES

Heavy-duty control valve
For accurate feed rate adjustment.

Completely enclosed system
Prevents fumes from escaping—no special venting required.

Easy access design
For easy recharging, servicing and simple maintenance.

Threaded fittings included
Standard threaded inlet and outlet fittings included for easy installation.



1. **Vent valve** bleeds air to ease lid removal.
2. **Lock ring** spins off, freeing lid and providing easy access. Snap-lock provides secure seal.
3. **Screen and check ball** are easy to reach for cleaning and periodic maintenance.
4. **Flow-through circulation** allows maximum output of sanitized water.
5. **External dial control** for easy flow rate adjustment.
6. **Drain valve** makes it easy to drain feeder for safer recharging and winterizing.
7. **Unions** are included for easy installation.

CALCIUM HYPOCHLORITE IS NOT TO BE USED IN ANY FORM.

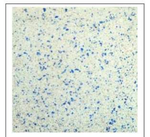
Light Reflectance Value



"QPG Kona Coast"

The L* a* b* (together with the corresponding HLC, RGB and CYMK) values are based on the average of various measurements using various spectrophotometers using D65 light with a standard observer according to CIE 1964 which may be updated or modified by any other relevant available information. They are not necessarily the L* a* b* figures intended by any standard and should therefore only be used as a guide. For more information or details please contact the relevant company, standards authority or organization listed **here** or refer to the color publications available on this site.

The colours depicted are also for guidance only. The displayed colour will depend on your monitor, browser and angle of the screen and pearl or metallic colours cannot be shown adequately. The finished colour, therefore, may **not** be as shown here.

The sRGS conversion system used is IEC 61966:2-1 D50 adapted which may differ from other conversions.
