Hi Jennifer,

Per our conversation, you asked that I send an email to update the permit as to what we will be doing

For the mechanical permit that was pulled under Thermo Direct, we will be doing the following:

- Installing a 3 ton air conditioner with a gas furnace for the first floor of the home that will support the 1st floor of the home and the additions being done.
- Installing duct work for the downstairs area of the home, and the additions being done.
- Installing a 2 head mini split ductless system for the upstairs area of the home
- Placing and venting out the exhaust fans in the bath rooms (WE WILL NOT BE DOING THE WIRING)

For the electrical permit that was pulled under Thermo Direct the following work will be completed:

- Electrical wiring of the 3 ton AC and gas furnace
- Electrical wiring of the mini split systems being installed
- NO WIRING OF THE EXHAUST FANS WILL BE DONE PER THE AGREEMENT WITH THE HOMEOWNER, she will have someone else doing this.

Please contact me at (919) 771-2665, if you have any questions.
