REF: Single wide M/H Set-up  
115 Mersadies Ln  
Cameron, NC 28326  
Rob Papa, Res

Dear Sir/Madam:

I made an on site visit to the above referenced single wide M/H set-up on July 3, 2017 to inspect the foundation set-up. The high end of the home was approx.62" high. The contractor, used the approved Minute Man MODEL LLBS Longitudinal and Lateral Bracing Systems. The flex tubes were anchored to steel pans under the piers as per Specifications From Minute Man Anchors, Inc. The amount of the Minute Man Bracing Systems and placement complies with the NC Regulations for Manufactured Homes, 2004 ed.. Because of the height, I required two additional cross straps be applied at the high end. The straps were in place at the time of my visit. After a thorough investigation of the site ; the placement and amount of piers and the straps required for a single wide mobile home, also complies with the requirements set forth in the NC Regulations For Manufactured Homes. I have no problem approving the set-up as done.

Please feel free to call me at 919-774-6074.

Sincerely,

Robert J. Bracken, PE
