Subject: Structural Evaluation – Over-height Pier and Anchor Evaluation
 HUD # RAD 448652

Home Owner: Aaron Gonzalez
 1087 Ballard Rd
 Fuquay Varina, NC 27526

I have examined the foundation of the manufactured home at the above location. The subject project is supported by double stack piers. Most of the CMU piers exceed 36" in height.

Anchoring is as per manufacturer's specs.

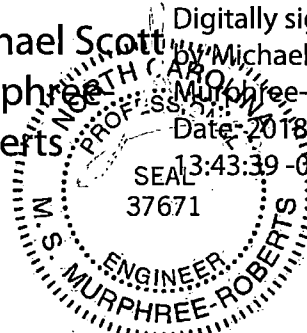

Based on my observations, the pier and anchoring system is structurally sound, properly designed and installed, and adequate to meet all expected loads.

If you have questions, please contact me.

Sincerely,

Scott Murphree-Roberts, PE
