Environmental Microbiology - Colilert Profile

Method: SM 9223B

Test Name: Colilert

Analyte	Test Result	Analyst	Date
Total Coliform, Colilert	Present	Darneice Lyons	11/17/2011
<i>E. coli</i> , Colilert	Absent	Darneice Lyons	11/17/2011

Report Date: 11/17/2011

Reported By: **Susan Beasley**

Explanations of Coliform Analysis:

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.

RE: Bacteriological water sample collected at: 781 Cortez Morrison Rd

Dear Mr. Hubbard,

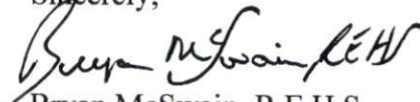

The report of your water sample taken for bacteria, revealed the presence of Total Coli form. A copy of the water sample report is enclosed. We have not received the remainder of your results, but will forward to you as soon as we receive them from the N.C. State Lab.

The enclosed pamphlet provides specific directions about how to disinfect the well. If you have any questions, contact the Aquifer Protection Section at the Fayetteville Regional Office at (910) 433-3300 or contact me at (910) 893-7547.

As soon as the well has been treated, contact the Harnett County Division of Environmental Health so another sample can be taken. No fee will be charged for a second sample if the request is made within thirty (30) days of this letter. After thirty (30) days, the fee for a second sample is \$25.00.

If you have any questions, please call me Monday through Friday between 8:00 and 9:00 a.m. at (910) 893-7547.

Sincerely,

Bryan McSwain, R.E.H.S.
Environmental Health OSWW Program Specialist
