RE: Footing inspection (Permit #SFD1811-0025)

Subject: 2830 Ponderosa Road
Cameron, NC 28326

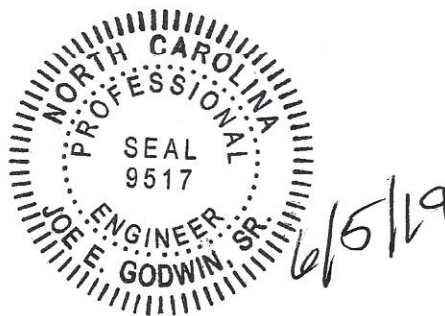

To Whom It May Concern:

Enoch Engineers performed an evaluation of the subject site referenced above on May 22, 2019. Our office observed the site where several locations of the footing were undercut and backfilled with #57 stone due to root masses and organics. We inspected the footings soils on and surrounding these areas and determined the soils meet a minimum allowable bearing capacity of 2,000lb/ft². In addition, the depth and width of said footings meet the minimum requirements for the 2018 North Carolina Residential Building Code for footings. If we may be of further assistance, please feel free to call.

Respectfully,

Joe E Godwin Sr., P.E.
