Hello Scott,

Good talking to you today...

To summarize what we discussed/agree to, to make sure we're on the same page.

1. We are able to continue with the Brick Veneer on Exterior Walls, except of the rear exterior walls where the Accordion Door and the Basement Slider Window.
2. We are clear, to Install Metal Roofing on the Metal Roofing Areas.
3. We are clear, to Install the Hardie Soffits, Fascias, etc.
4. Can't proceed with Insulation until the 12' Accordion Door and Slider window is installed and the other items on the list are resolved.

Thanks

Ralph Locklear
