Reference: Footer Evaluation  
1953 Old Stage Road South  
Erwin, North Carolina

Mr. Johnson,

Seacoast Engineering P.C. recently provided a footer evaluation of the residential structure under construction at 1953 Old Stage Road South located in Erwin, North Carolina. This letter is the report of our findings and evaluations.

The footer for the house goes over an old drain line for an abandoned septic system. There are 3 areas in the garage where there is about a 3' section of rock under the footing.

Based on the results of our evaluation, the old drain line under the footing does not adversely affect the performance of the concrete footing.

If you have any questions after reviewing this, letter, please do not hesitate to contact us at your convenience.

Respectfully,

Michael A. Copeland, P.E.
