Mr. Tapani Kymalainen

Subject: Lot 147 – 160 Lakeforest Trail, Sanford, NC 27332

Mr. Kymalainen,

At your request, I reviewed the footing excavations. Specifically, I reviewed the excavations for the foundation wall footings and the interior piers footings for soil stability issues and overall adherence to the plans for dimensions and depth.

Based on my observations and analysis, the existing soil within the footing excavations were structurally adequate to support 2000PSF. Also, the dimensions of the excavations were in general compliance of the provided construction documents. Therefore, the footing preparations were in general compliance of the 2018 North Carolina Residential Building Code.

If you need additional information or have other questions, please let me know.

Sincerely,

Randy K. Wise, PE
