J Matthews Builder, Contractor

Dear Sir/Madam,

I made an onsite visit to the above referenced residential building site on May 4, 2020. The purpose of the visit was to do an Inspection of some soft soil in a foundation footing. I recommended that the contractor remove the soft soil down to firm soil and back fill with stone. I returned to the site on May 5 and ran penotrometer test on the soil and got consistant readings of 2000 psf or better. I told the contractor to go ahead and place the stone because of the chance of rain. The footings will support the live and dead loads per the NC State Residential Building Code, 2018,ed.

If you have any questions please feel free to call me at 774-6074.

Sincerely,

Robert J. Bracken

Robert J. Bracken
