RE: Engineering - Plan Analysis

1210 Oak Grove Church Road, Angier, NC

Johnson Residence Plan

Project No.:20DDM-0416A-2

To whom it may concern:

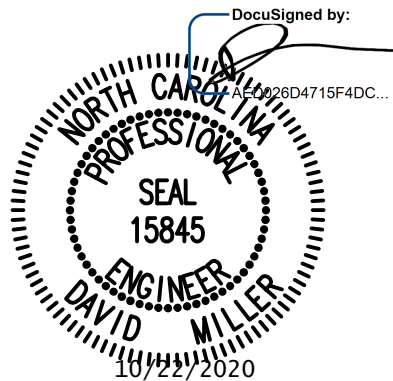

The undersigned (Engineer of Record - EOR) has analyzed the following for the above referenced site.

The stairway foundation is outlined on the attached drawing for the new stairway in the garage. The LVL rafter and collar beams can be attached using structural four 8 inch long Timberlok screws in lue of the (2)1/2" diameter through bolts. The stairway opening should be verified for the changes to the floor truss system.

Sincerely,

David Miller, PE
