William Hawley
PO Box 1778
Angier, NC 27501

This letter address inspection of the footing at the construction residence of 185 Hawley Loop Lane, Fuquay Varina, NC 27526. The footings are constructed as per the approved building plans and to current 2018 North Carolina Building code requirements with respect to loading and serviceability. The footing design is adequate to support 2,000 psf allowable soil bearing capacity. Concrete strength for footings is to be 3000 psi min.

Please do not hesitate to contact me if you have any questions, or if I may be of further assistance regarding this matter.

Sincerely,

John F. Oerter, PE
