Lillington, NC
Permit # SFD2108-0004

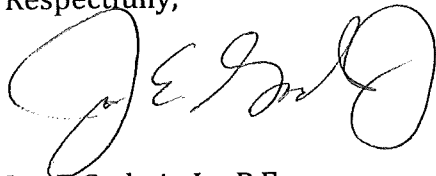

Subject: Footing issue

To Whom It May Concern:

Our office has performed an evaluation of the situation pertaining to organic material found in and under the proposed footing at the above referenced project. Based on my observation, it was recommended that all organic matter encountered should be entirely removed under the footing areas impacted. The newly excavated area should be backfilled with #57 stone, or a similar, uniformly graded aggregate. Based on my observation, these measures have been completed as of the date of this letter, and the allowable bearing in the impacted areas should meet or exceed the minimum bearing capacity of 2,000 psf.

If you have any question or concerns regarding this matter, or if we may be of further assistance, please do not hesitate to contact us.

Respectfully,

Joe E Godwin Jr., P.E.
