Engineering - Field Observation – Subgrade Testing of Stem Wall Backfill
Lot 1 Cameron Woods Subdivision
32 Western Pine Way, Sanford, NC
Project No. 22PG-0327-A-1 (22PG-0503-D), Harnett County Permit No. SFD-2108-0079

Matt:

Thank you for using Piedmont Geotechnical. The site was visited on May 3, 2022 to test the fill placed within the stem walls for the above referenced home site. The fill soils were tested with a Static Cone Penetrometer (SCP) test. The fill consisted of red tan silty sand. Testing has conducted to about 4 feet below the bottom of slab elevation.

Based on the observation and testing, the fill soils within the stem walls have been adequately compacted to support the proposed loads of the slab (2,000 psf).

Sincerely,

NORTH CAROLINA
