Engineering - Subgrade Testing of Stem Wall Backfill
Lot 8 Cameron Woods Subdivision
180 Western Pine Way, Sanford, NC
Project No. 22PG-0509-C, Harnett County Permit No. SFD-2108-0088

Dear Mr. Galvin:

Thank you for using Piedmont Geotechnical. The site was visited on May 9, 2022 to test the fill placed within the stem walls for the above referenced home site. The fill soils were tested with a Dynamic Cone Penetrometer (DCP) test in general accordance with ASTM special publication 399. The fill consisting of tan silty sand was tested to 2 ft. below the planned bottom of slab elevation.

Based on the observation and testing, the fill soils within the stem walls have been adequately compacted to support the proposed loads of the slab (2,000 psf).

Sincerely,

022595
