All,

These folks have decided to go with a 3 BR SWMH. They are going to update their site plan/applications. They do not want to lose their place with EH for the existing tank inspection (which was originally designed for a 3BR SWMH)

They are flagging the location for EH, and EH is scheduled for the 17<sup>th</sup>. When they update their applications, simply change the permit type/subtype and update the permit fees.

Once they have their permits in hand, they will be able to apply for a temp occupancy for the RV until their home is set up, inspected and completed per Randy.
