Engineering - Field Observation, Stem Wall Fill/Compaction Testing  
Lot 4 Cameron Woods Subdivision  
100 Red Pine Court, Sanford, NC  
Project No. 22PG-1005-A, Harnett County Permit No. SFD-2203-0081

Dear Mr. Galvin,

Thank you for using Piedmont Geotechnical. The site was visited on October 5, 2022 to test the fill placed within the stem walls at the above referenced address. The subgrade was tested with a Dynamic Cone Penetrometer (DCP) test in general accordance with (ASTM) special publication 399, and found to be of adequate bearing capacity. The building area was probed with a steel probe rod for comparison to the test locations. The subgrade was tested to about 2 ft. below the bottom of slab elevation.

Based on testing and observation, the fill placed within the stem walls has been adequately compacted to support the proposed loads (2,000 psf) of the slab.

Sincerely,
