Re: "Magnolia" plan
All elevations under construction

Dear Mr. Clowes:

Per your request, the plan noted above was reviewed to address an alternative for the LVL beam above the family room.

Analysis revealed a W 12 x 16 steel beam may be installed in lieu of the plan specified (3) 1 3/4" x 20" LVL beam. Secure a ripped 2x nailer and 1/2" OSB filler to the top flange with construction adhesive and set the top of the nailer flush with the top of the joists. Pack out the web on each side with 2x material secured with 1/2" through bolts with nuts and washers at 24" o.c. The beam is to be supported by (6) jacks at each end fastened with Simpson CS16 straps at 24" o.c. This configuration will provide the required support for all applied loads.

Please call me if you have any questions.

Re: "Magnolia" plan

Dear Mr. Safriet:

The above noted plan was reviewed to address using Thermo-Ply Blue sheathing in lieu of 7/16" OSB sheathing at exterior walls.

Review revealed that Thermo-Ply Blue may be used in place of 7/16" OSB for all exterior walls with the exception of portal framed garage walls. Thermo-Ply Blue may also be used in place of gypsum board at all interior braced walls designated by the plan as "GB" wall bracing method. To install Thermo-Ply Blue sheathing, block all horizontal joints and fasten the sheathing with min. 15/16" crown, 16 ga. staples or .012" min. diameter 3/8" head diameter, 11 ga. 1 1/4" length nails. Space fasteners at 3" o.c. along panel edges and in the field with minimum 1" embedment into framing. Do not countersink fasteners. Install per manufacturer's specifications. This configuration will provide the required support for all applied loads.

Please call me if you have any questions.
