Chargeable Items			1:00P	1:30P

* Travel time and mileage will be billed in accordance with the contract.

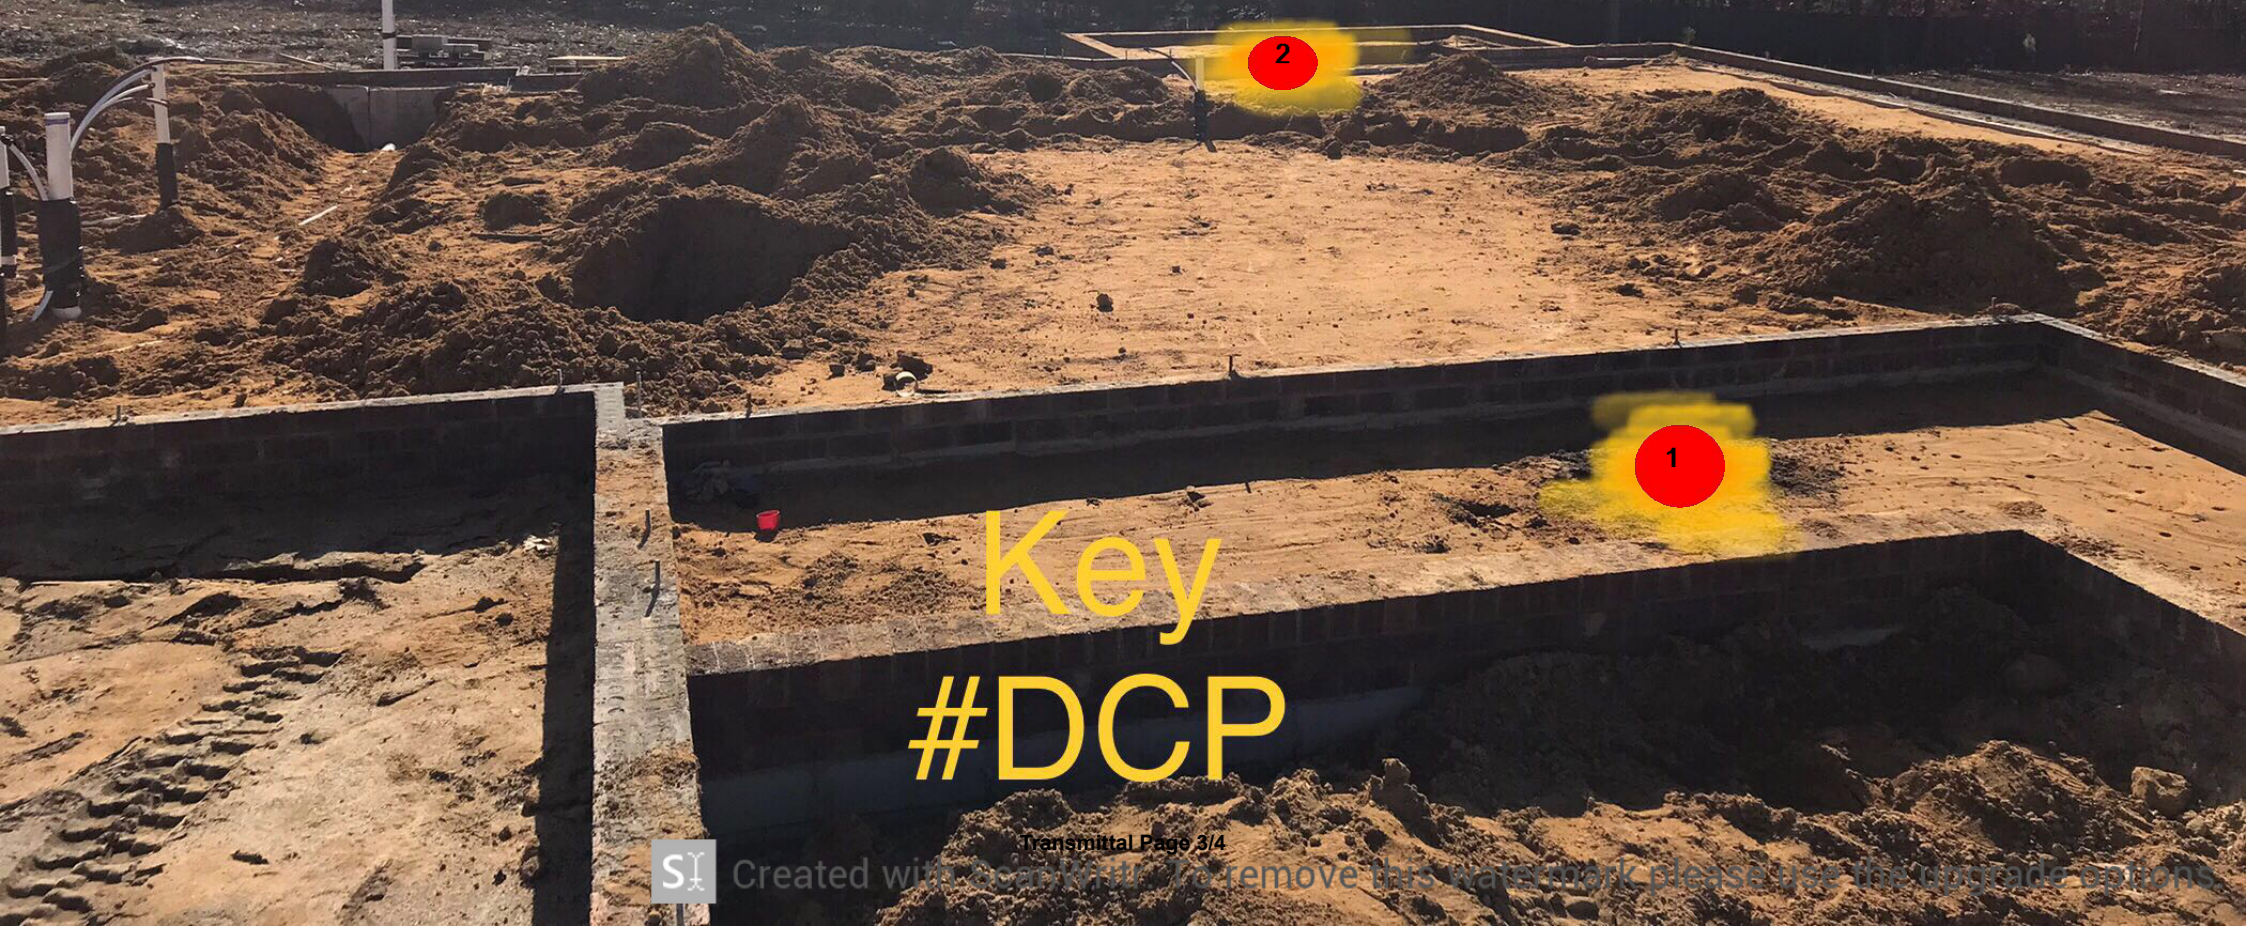

Summary of Services Performed (field test data, locations, elevations & depths are estimates) & Individuals Contacted.

The undersigned arrived on site, as requested, to observe the excavation of footings for the Front Porch and Back Porch.

Utilizing a Dynamic Cone Penetrometer (ASTM STP-399) to check the bearing capacity of soil at the aforementioned locations, test results indicated that soils, at the areas and elevations tested, should be capable of supporting a foundation designed for a net allowable bearing capacity of 2,000 psf.

ECS will return upon request for additional services.

Sulaiman Sharieff
