**RE: Footing/Foundation Inspection  
25 Doug Johnson Lane  
Angier, North Carolina  
Permit Number: AFD2302-0002**

Dear Mr. Pollard:

Per your request, TRC has completed an inspection and evaluation for the footings/foundations at the above referenced site. It is our understanding the porch/stoop footings were poured prior to building inspections visiting the site due to impending weather events. I visited the site on July 14, 2023 to observe the footings as installed. The footings in question were partially uncovered to allow for inspection of the footings and surrounding soils. In addition, installation personnel were interviewed to discuss the installation methods. Per my observations of the installation and the associated permit drawings, it is my opinion the footings substantially meet the intent of the approved plans, building code requirements, and the loads to be present after completion of construction. As such, this letter serves as our certification of the footing installation.

If you have any questions, please call me at (919) 827-0864.

Sincerely,  
C. Tyrus Clayton, Jr., PE
