**Inspection Department disclaimer:**

Upon the receipt of a signed written document as required under subsection (a) of Article 160A-413.5., Code Enforcement shall be discharged and released from any liabilities, duties and responsibilities imposed by this article or in common law from any claim arising out of or attributed to the component or element in the construction of the building for which the signed written document was submitted. Be aware that this inspection will be noted in all inspection records including the Certificate of Occupancy or Certificate of Compliance. This inspection does not address any local ordinances or zoning requirements.

## REPORT

TO: Ocmulgee

FROM: TME - Bryant

PROJECT: 1100 Young Road

DATE: February 16, 2024

TME visited the site to perform 3rd party observation of forms and rebar placement for basement walls prior to concrete placement. Rebar reinforcement in place per on-site plans. Sufficient projection observed.

It should be noted that minor cracking commonly occurs in construction for various reasons including but not limited to, temperature fluctuations relative to expansion and contraction of materials, concrete shrinkage, changes in moisture content, improper construction, and normal settlement. No warranty is implied for such items by this letter. No performance guarantee shall be assumed. In all cases the contractor is solely responsible for the direction and quality of the work, adherence to the plans and specifications, and scheduling testing services. Only the client or it's designated representatives with written consent may use this document.
